## Precautions

READ this manual BEFORE operating or servicing this equipment.

ONLY PERMIT QUALIFIED PERSONNEL TO SERVICE THIS EQUIPMENT. EXERCISE CARE WHEN MAKING CHECKS, TESTS AND ADJUSTMENTS THAT MUST BE MADE WITH POWER ON. FAILING TO OBSERVE THESE PRECAUTIONS CAN RESULT IN BODILY HARM.

FOR CONTINUED PROTECTION AGAINST SHOCK HAZARD CONNECT TO PROPERLY GROUNDED OUTLET ONLY. DO NOT REMOVE THE GROUND PRONG.

DO NOT allow untrained personnel to operate, clean, inspect, maintain, service, or tamper with this equipment.

DISCONNECT ALL POWER TO THIS UNIT BEFORE REMOVING THE FUSE OR SERVICING. FAILURE TO DO SO MAY RESULT IN BODILY INJURY OR PROPERTY DAMAGE.

|  |  |
| :--- | :--- |
| BEFORE CONNECTING/DISCONNECTING ANY INTERNAL |  |
| COMPONENTS OR INTERCONNECTING WIRING BETWEEN ELECTRONIC |  |
| EQUIPMENT ALWAYS REMOVE POWER AND WAIT AT LEAST THIRTY (30) |  |
| SECNDS BEFORE ANY CONNECTINS OR DISCONNECTONS ARE MADE. |  |
| FAILURE TO OBSERVE THESE PRECAUTIONS COULD RESULT IN DAMAGE TO |  |
| OR DESTRUCTION OF THE EQUIPMENT OR BODILY HARM. |  |

CALL OHAUS for parts, information, and service.

OBSERVE PRECAUTIONS FOR HANDLING ELECTROSTATIC SENSITIVE DEVICES.

The GEO-Value of verified balances explains for which location of use the balance has been verified. This GEO-Value is shown on the balance total price display shortly after the balance is turned on.

GEO-Value table

| Country | Geo-Width | Geo-Value (default) |

## 1 Introduction

### 1.1 Overview

The RS Series, with integrated printer, has the family appearance of Tiger series scales.
The target customers for RS Series are:

- Small store business (i.e. Fruit \& Vegetables, cooked meat, cheese, etc.)
- Bakery

All our equipment is assembled, tested and packed with great care. If you find something that does not meet your expectations, please contact OHAUS immediately.

The RS Series scale is a high precision weighing instrument, which has to be approved and stamped by Weights and Measures. This scale is stamped in our production plant or by your local Weights \& Measures office. Please check the stamping stickers on the scale before use.

Please read this instruction manual carefully.
If properly used and maintained, this scale will provide years of accurate weighing. Please handle it as you would any piece of fine electronic equipment.

### 1.2 Specification

| Model | RS-3S-000E | RS-6S-000E | RS-15S-000E | RS-30S-000E |
| :---: | :---: | :---: | :---: | :---: |
| Capacity | $3 \mathrm{~kg} / 1 \mathrm{~g}$ | $6 \mathrm{~kg} / 2 \mathrm{~g}$ | $15 \mathrm{~kg} / 5 \mathrm{~g}$ | $30 \mathrm{~kg} / 10 \mathrm{~g}$ |
| Overload weight | 4.5 kg | 9 kg | 22.5 kg | 40kg |
| Load cell capacity | 4.5 kg | 15kg | 30kg | 40kg |
| Display | LCD with backlight; 6 -digit weight, 6 -digit unit price, 7 -digit total price, 5 -digit tare and 12 14-segment characters for instruction |  |  |  |
| Customer display | Adjustable |  |  |  |
| Key | 50 membrane keys |  |  |  |
| Preset key | 30: Store up to 60 PLUs |  |  |  |
| Stainless steel platter | $342 \mathrm{~mm} \times 242 \mathrm{~mm}$ |  |  |  |
| PLU quantity | 1000 |  |  |  |
| Transaction quantity in one ticket | Max. 100 |  |  |  |
| Vendor quantity | 4 |  |  |  |
| Group quantity | 20 |  |  |  |
| Power | 100~240VAC, 50/60HZ or 12VDC/5Ah lead-acid rechargeable battery (option) |  |  |  |
| Gross weight/ Net weight | Gross weight: 7.7 kg ; Net weight: 5.6 kg |  |  |  |
| Shipping Box ( x W $\times \mathrm{H}$ ) | 533mm x $471 \mathrm{~mm} \times 230 \mathrm{~mm}$ |  |  |  |
| Working environment | Temperature: -100C~400C; Humidity: 85\%RH, non-condensation |  |  |  |
| Storage environment | Temperature: -250C~500C; Humidity: 85\%RH, non-condensation |  |  |  |
| Report delete | Delete report automatically (keep 3-business day reports) or manually. |  |  |  |

| Reports | * Sales report <br> $\approx$ PLU report <br> - Promotion report <br> * Group report <br> * Group hourly report | * Hourly report <br> * Settle report <br> * Store/ sell/ inventory report <br> * Void/ ST report <br> * Vendor report | * Cash drawer report <br> - Weekly report <br> * Monthly report <br> * Yearly report <br> $\rightarrow$ Log |
| :---: | :---: | :---: | :---: |
| Checkout function | Cancel transaction Refund Open Cash drawer Suspend | Discount <br> Rebate <br> Raffle <br> Gift | Settle amount <br> Multi-payment methods <br> ECR checkout method |
| Paper | Ticket or label, the thickness should be less than 0.12 mm |  |  |
| Weighing function | Zero, tare, Large weight input, 100 g |  |  |
| Other functions | Date/ time display, work as a calculator and quick key function |  |  |
| Password and relevant authority | Flexible password management make privilege management easier |  |  |
| Communication | 2 RS-232, 1 Ethernet (option), 1 USB (option), 1 cash drawer port |  |  |
| PC software | bServ for data management |  |  |
| SW update | Through RS-232 or Ethernet |  |  |

### 1.3 Model Configurature

RS - X S - X X X X-XX (country code)

Communication: None: Standalone; E: Ethernet; EB: Ethernet plus USB (N/A)
Structure: $0=$ Compact
Print: $0=$ Print out only
Display: $0=$ Segment
Resolution: 3000 single range
Capacity: $3=3 \mathrm{~kg} ; 6=6 \mathrm{~kg} ; 15=15 \mathrm{~kg} ; 30=30 \mathrm{~kg}$
RS Series serial ticket scale

### 1.4 Approval

- OIML
- CB Report

### 1.5 Option

| Description | CIMF number |
| :--- | :---: |
| Tower kit | 72182129 |
| Lead acid rechargeable battery | 72173948 |
| Ticket scroll, Internal dia. 12mm, outside dia. 68mm | 72181866 |
| Label scroll, Internal dia. 12mm, 500 labels | 72181868 |

### 1.6 Sealing

## 2 Installation

### 2.1 Precautions

Before you install your RS Series scale, identify the best location for the equipment. The proper environment enhances the operation and longevity of the scale. Keep in mind the following factors, which might have a negative influence on the scale's operation:
Vo Vibration diminishes the scale's ability to measure accurately. Excessive vibration from equipment such as conveyors can cause inaccurate and non-repeatable readings.
(e) Be sure the scale is leveled properly.
$\rightarrow$ Air currents can also diminish a scale's performance. Avoid placing the scale in front of or directly under air vents.
Other than items being weighed, keep the scale free from objects rubbing or pressing against the platter.

### 2.2 Contents of Packaging

Package contents for all RS Series units include:
 RQuick operation guide

### 2.3 Interface

The communication interface is located on the front of scale bottom. There are 5 ports as follows:
(o) COM1 (male DB9 RS-232): to connect with scanner

- COM2 (male DB9 RS-232): to connect with PC
(G) Cash Drawer* (RJ1): to connect with cash drawer
Ethernet port (RJ45): network (option)

USB: to connect with PC or scanner (option)

* The requirement on the cash drawer is as follows:

| Rating <br> Voltage(VDC) | Loop DC resistor( $\Omega$ ) <br> $\mathrm{T}=20^{\circ} \mathrm{C}$ | Under rating voltage |  | Electrified time under Max. <br> voltage $(\mathrm{ms})$ |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Max. electrified time(ms) | Current(mA) | max | Continue rate |
| 12 | 12 | 200 | 1000 | 200 | $10 \%$ |

### 2.4 Installation of Scale

1. Open the box, carefully remove the packing material, and take all items out of the carton.
2. *Install the tower, if it is a tower version.
3. *Install the ticket or label roll.
4. *Install the battery, if it has a battery.
5. Remove the shipping protection screw (3kg only) as illustrated in the left picture, and then put the platter on the top of the scale.
6. To connect a cash drawer to RS Series, plug the cable of the cash drawer into the socket on the scale.
7. Set the scale base on a sturdy, level surface. Level the scale by turning the adjustable feet on the bottom of the unit. Adjust the feet until the level bubble is in the center of the circle.

Bubble indicator:

8. Connect the power cord to the scale base and AC power socket.

* The following 3 sections will describe how to install.

### 2.5 Installation of Paper Roll

The requirements of the tickets and labels are as follows:

The thickness of ticket or label plus liner should be less than 0.12 mm .
Notice: If paper is not long enough to print the whole ticket, install a new paper roll and print the whole ticket again.
The procedures to install a ticket roll are as follows:
1 ) To open the printer door, push the switch of the printer door backward to the customer side with thumb. This switch is located on the bottom of the scale.
2) Open the door wider.
3) Take the paper roll out (if needed). Put the new roll on the metal column.

4 ) Pull out some paper and position it between the two metal brackets on black roll bar.
5) Close printer door and tear off excess paper.

6 ) Press key [Mode], then [ $X$ ] to test paper.
The procedures to install label are as follows:

1 ) Push the switch of the printer door backward to the customer side with thumb, the door will open.
2) Open the door wider.
3) Take the paper roll out (if needed). Put the new roll on the metal column.
4) Peel off the first two labels.
5) To limit the movement of the label, adjust the bar located at the top of the plastic guide, so the label fits snugly in place.
6) Take liner and insert through the plastic guide located behind the tear bar on the side of scale.
7) Pull liner trough and ensure the bottom edge of the liner is located directly above the metal bracket on the bottom of the black roll bar.

) Close printer door.
9) Press [MODE] and [X] to test the label for scale to get some relevant data.

Notice: To avoid damage to the printer, don't slam the printer door.

### 2.6 Installation of Tower

### 2.7 Installation of the Battery

RS Series has a charge function and uses 12V/5Ah rechargeable lead-acid batteries. It is an option and is not in the scale when shipped.
To remove the battery from the battery holder:

1) Remove the platter.
2) To take the cover up away, push the fixing button of the battery cover to the right and forward.
3) Remove the harness from the two electronic poles.
4) Hold the middle of the battery in one hand. With the other hand, hold the pole connector of the battery to take the battery out of the holder.
Te To install the battery:
5) Remove the platter.
6) Put the battery in the holder, and make sure that the harness is outside,
7) Connect the harness with the electric poles of the battery
Notice: Red harness should connect to the positive pole (red or +), and black harness should connect to the negative pole (black or -), If not installed properly, the battery may be damaged.

## Notice of lead rechargeable battery

2 The battery (12V/5Ah rechargeable lead-acid battery) service life will be affected by the charge and discharge conditions. When used properly, it can withstand 300 cycles;
2. The new battery can provided about 30 hours work after fully charge. A fully charged battery normally lasts 12 hours. The charge time will be shorter if the battery is not discharge fully. It is recommended to charge the battery every day.
z Do not short the positive pole (+) and negative pole (-) when replacing the battery.
2. Charge the battery at least every 3 months to keep it in good condition.
2. The work hours of the battery are shorter than normal if the battery is not used for a long time (i.e. more than 2 months). At this time, please cycle battery at least 3 times by charging it and using it until fully discharged to make the battery recover to normal condition.
2. The battery is not warranted due to the fact that its service time is greatly influenced by individual.
2. The number of work hours will decrease as the battery ages. This is normal for rechargeable batteries.

2 Don't let the battery touch chemical solvent, oil, water, etc. Don't let it near fire. Don't open the battery, or it may cause explosion or damage to the battery.

### 2.8 Power up and Turn off the Scale

Plug the cord into a properly grounded AC power outlet and press the switch in the middle of the left bottom of the scale. The scale will go through a series of self-tests and then will proceed to normal operating mode. The power-up sequence is as follows:

| Display sequence | Description | $\begin{gathered} \text { Display } \\ \text { on } 1^{s t} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \end{gathered}$ | $\begin{aligned} & \text { Display } \\ & \text { on } 3^{\text {d }} \text { line } \end{aligned}$ | Display on the bottom line | Lit cursor |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step 1 | All segments are lit on the display. | 888.888 | 888.888 | 8888.888 | 888888888888 | All cursors |
| Step2 | From top to bottom, it displays the part number of the software, version number, country code and GEO value | 179403 | 1.0 | $5 \cup 20$ |  |  |
| Step3 | Ready to weigh | 0.000 | 0.00 | 0.00 | VI TILKET |  |

Press the power switch to turn off the scale.
Note: Before switching on the RS Series scale, please ensure that there is nothing on the platter.

### 2.9 Option

12V/5Ah rechargeable lead-acid battery
Tower column

## 3 Operation Interface

### 3.1 Display

### 3.2 Cursor

| Cursor | Instruction of lit cursor | Cursor | Instruction of lit cursor |
| :---: | :--- | :---: | :--- |
| $\rightarrow 0 \leftarrow$ | The weight is gross 0 | NET | The weight is net weight |
| Prepack | Scale is in prepack status | LS | Scale is in large sale status |
| ST | Scale is in ST mode | PLU | The data on the right is PLU \# |
| $X$ | Scale is in by count mode | Fix | The unit price, tare or PLU will not disappear when items <br> are removed or accumulated into total |
| 100 g | The weight unit of the price is 100g | S | The current power is AC |
| $G$ | Lit: The power is battery <br> Flash and lit $5:$ Charging <br> Flash and no s: Low battery, <br> needed to charge or change battery | 3 lit blocks: the scale is master, and connects with at least <br> one slaver <br> 2 lit blocks: the scale is a slave, and connects with master. <br> Off: scale is standalone or does not connect to other scales |  |

### 3.3 Keyboard

### 3.4 Key Function in Weighing Mode

### 3.4.1 20 Function Keys

mes Main function
Press the key to complement its main function

| Key | Key name | Function |
| :--- | :--- | :--- |
| $[$ Disc $]$ | Discount key | Input the discount percentage or discount price |
| $[-]$ | Rebate key | Input the rebate to total price |
| $[\mathrm{PLU}]$ | PLU key | Recall PLU or input unit price manually |

| $[\mathrm{X}]$ | By count key | Access to by count mode |
| :--- | :--- | :--- |
| $[\rightarrow \mathrm{T} \leftarrow]$ | Tare key | Tare the scale |
| $\left[{ }^{*}\right]$ | Print key | Show total or print ticket and open cash drawer |
| $[\mathrm{V} 1],[\mathrm{V} 2],[\mathrm{V} 3],[\mathrm{V} 4]$ | Vendor key | Subtotal transactions |
| $[\mathrm{C}]$ | Clear key | Clear input |
| $[\mathrm{Void}]$ | Void key | To cancel transaction |
| $[0] \sim[9]$ | Number key | To input digits |
| $[\mathrm{Mode} / \uparrow]$ | Mode/Shift key | To get into/out of setting mode or complete the shift function of some keys |
| $[\uparrow]$ or $[\downarrow]$ |  | Select the wanted transaction in void mode |

* Shiff function (on the top right corner of key)

Press and hold [Mode/ $\uparrow$ ] key, then press the following key to complete function written on its top right corner.

| Key | Shiff function |  |  |
| :--- | :---: | :--- | :--- |
| $[$ Disc $]$ | C | Time key | Access to or exit date/time showing mode |
| $[-]$ | LS | Large item key | Access to large weight input mode |
| $[\mathrm{C}]$ | $\rightarrow 0 \leftarrow$ | Zero key | Zero scale |
| $[\mathrm{PLU}]$ | ST | Refund key | Access to or exit refund (ST) mode |
| $[\mathrm{X}]$ | 100 g | l 100 g key | Toggle between 100 g unit price unit and kg unit price unit |
| $[\rightarrow \mathrm{T} \leftarrow]$ | ID | Suspend key | Suspend or take out of transactions |
| $\left[{ }^{*}\right]$ |  | Cash drawer key | Open cash drawer |
| $[\mathrm{VI}]$ | E | Calculator key | Access to or exit calculator mode |

Key function in calculator mode (on the bottom left corner of key)

| Key | Function on the bottom left corner | Example: $3 \times 5+5.67=20.67$ |  |
| :--- | :--- | :--- | :--- |
| $[\rightarrow \mathrm{~T}<]$ | $[+]:$ plus key | Key operation | Display shows as follows |
| $[\mathrm{X}]$ | $[-]:$ minus key | $[3][\mathrm{x}]$ | 3 |
| $[\mathrm{PLU}]$ | $[\mathrm{x}]:$ multiply key | $[5]$ | 5 |
| $[-]$ | $[/]:$ divide key | $[5][\cdot][6][7]$ | 15 |
| $[*]$ | $[=]:$ equal key | $[=]$ | 5.67 |
| $[\mathrm{VI}]$ | $[\cdot]:$ point key |  | 20.67000 |
| $[\mathrm{C}]$ | Clear key to clear input |  |  |

### 3.4.2 30 Preset Keys

Press the key or double click the key to recall PLU.
re 3 keys, $[R], ~[X]$ and $\left[\tau^{2}\right]$ can be set as vendor keys, [V4], [V3] and [V2]. In this case, they have the same functions as [V1], but they can not be used to recall PLU.

## 4 Operation

## 4．1 Zero

There are two ways to re－zero the scale：
Power－up zero
The scale will automatically capture zero when it is turned on．The power－up zero capture range is $+/-10 \%$ of the scale capacity．When the scale is turned on with a weight on the platter，which is more than $+/-10 \%$ of the capacity，the scale will not capture zero and the weight display will show＂－－－－－＂．After removing the weight，the scale will capture＂zero＂．
Pushbutton zero
Press and hold key［Mode］，then press［ $>0<$ ］to re－zero the scale within the range of $+/-2 \%$ of the scale capacity．To use this function，the scale must be in the gross weighing mode（NET cursor must be off）and in a no motion condition．When the weight on the platter is more than $+/-2 \%$ of the scale capacity，scale can not be re－zeroed．

## 4．2 Tare

Tare is a subtract tare．When tare exists，the most the scale can weigh is its full capacity minus tare．
Tare can not be cleared unless the net weight is equal to gross weight．Tare function is enabled only when the displayed weight value is positive．

## 4．2．1 Pushbutton Tare

| Procedure | Description | $\begin{array}{c\|} \hline \text { Key } \\ \text { operation } \end{array}$ | $\begin{gathered} \text { Display } \\ \text { on } 1^{\text {st }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \end{gathered}$ | Display On $3^{\text {rd }}$ line | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{gathered} \hline \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step1 | Put the container（20g）on the platter |  | 0.020 | 0.00 | 0.00 | UT TICKET |  |
| Step2 | Tare and show tare 0.020 kg | $[\rightarrow T<]$ | 0.000 | 0.00 | 0.00 | T0．020К6 | MET |
| Step3 | Remove the container from the platter |  | －0．020 | 0.00 | 0.00 | T0．020K6 | MET |
| Step4 | Clear tare and get back the gross weighing mode | $[\rightarrow T<]$ | 0.000 | 0.00 | 0.00 | UI TICKET |  |

4．2．2 Input Preset Tare Manually

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } s^{\text {st }} \text { line } \end{gathered}$ | $\begin{array}{\|c} \hline \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \end{array}$ | $\begin{aligned} & \text { Display } \\ & \text { on } 3^{\text {rd }} \text { line } \end{aligned}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on the bottom line } \end{array}$ | $\begin{array}{\|c\|} \hline \text { Lit } \\ \text { cursor } \end{array}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step1 | Gross weight should be zero |  | 0.000 | 0.00 | 0.00 | UT TICKET |  |
| Step2 | Please input the tare value | $[\rightarrow T<]$ | 0.000 | 0.00 | 0.00 | TRRE 0.000 |  |
| Step3 | Input the tare value 1.000 kg | ［1］［0］［0］［0］ | 0.000 | 0.00 | 0.00 | TRRE 1.000 |  |
| Step4 | Get tare | $[\rightarrow T \leqslant]$ | －1．000 | 0.00 | 0.00 | PT 1．000KG | MET |
| Step5 | Clear tare and get back the gross weighing mode | $[\rightarrow T \leftarrow]$ | 0.000 | 0.00 | 0.00 | UI TIEKET |  |

The tare value is a multiple of the increment．If the tare value entered is not a multiple of the increment，then the value will be rounded（up or down）to the closest multiple．
e．g．If the increment is .005 lb and the tare value entered is .007 lb ，then the scale will use a tare value of .005 ．

## 4．2．3 Tare Display

Tare will be shown on the bottom line．＂ T ＂means pushbutton tare，＂PT＂means preset tare including the tare in PLU If tare exists，when key［V1］is pressed，the bottom line will show subtotal for about 1～2 minutes，then show tare．

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 1^{s} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {d }} \text { line } \\ \hline \end{gathered}$ | $\begin{aligned} & \text { Display } \\ & \text { on } 3^{d r} \text { line } \\ & \hline \end{aligned}$ | Display on the bottom line | $\begin{aligned} & \text { Lit } \\ & \text { cursor } \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step1 | Put the container（ 20 g ）on the platter |  | 0.020 | 0.00 | 0.00 | VI TICKET |  |
| Step2 | Tare is 20 g | $[\rightarrow T<]$ | 0.000 | 0.00 | 0.00 | T0．020KG | NET |
| Step3 | Recall PLU1 without tare | ［1］ | 0.000 | 9.80 | 0.00 | яw 1 T0．020К6 | MET |
| Step4 | Put the item on the platter |  | 0.500 | 9.80 | 4.90 | яш 1 T0．020К6 | MET |
| Step5 | Show subtotal 4．90\＄on the bottom line | ［V1］ | 0.500 | 0.00 | 0.00 | 数P1 814.90 | MET |
| Step6 | Show vendor \＃and tare 0．020kg | 1～2 seconds later | 0.500 | 0.00 | 0.00 | थ7 70.020 | MET |
| Step7 | Remove the container from the platter |  | －0．020 | 0.00 | 0.00 | リ7 10.020 | MET |
| Step8 | Clear tare and show the subtotal 4．90\＄ | $[\rightarrow T<]$ | 0.000 | 0.00 | 0.00 | 的P18 4.90 |  |

### 4.3 Item Management Levels

There are 1000 PLUs and 20 groups.

### 4.4 Vendor Log in and Log out

When vendor's password exists, transactions can be accumulated only after this vendor logs in. The procedures to log in and log out are as follows:
Log in: e.g. vendor 1 logs in

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 1^{\text {st }} \text { line } \end{gathered}$ | $\begin{aligned} & \text { Display } \\ & \text { on } 2^{\text {nd }} \text { line } \end{aligned}$ | $\begin{aligned} & \text { Display } \\ & \text { on } 3^{d x} \text { line } \end{aligned}$ | Display on the bottom line | $\begin{array}{\|c\|} \hline \text { Lit } \\ \text { cursor } \\ \hline \end{array}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step1 | Weighing mode |  | 0.000 | 0.00 | 0.00 | TILKET |  |
| Step2 | Please input password of vendor 1 | [V1] for 5 seconds |  |  |  | $P W$ |  |
| Step3 | Input the password | [1][2][3] |  |  |  | PU *** |  |
| Step4 | One beep means vendor 1has logged in | [*] |  |  |  | Ll LOG Ify |  |
| Step5 | Weighing mode, V1 means V1 has logged in | About 1 second Iater | 0.000 | 0.00 | 0.00 | L) TICKET |  |

If 4 vendors have logged in, the display is as follows:

| ------- | V1234 means 4 vendors have logged in | 0.000 | 0.00 | 0.00 | VI234 TICKET |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |

Log out: i.e. vendor 1 logs out

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } \mathrm{y}^{\text {st }} \text { line } \end{gathered}$ | Display on $2^{\text {nd }}$ line | Display on $3^{\text {rd }}$ line | Display on the bottom line | $\begin{array}{\|c\|} \hline \text { Lit } \\ \text { cursor } \end{array}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step 1 | V1 has logged in |  | 0.000 | 0.00 | 0.00 | VI23Y TICKET |  |
| Step2 | "V1 log out" shows about 2 seconds | [V1] for 5 seconds |  |  |  | 1/7 LOG DUT |  |
| Step3 | No V1 means V1 has logged out | About 1 second later | 0.000 | 0.00 | 0.00 | V23Y TILKET |  |

When scale is turned off, all vendors will automatically be logged out.

### 4.5 Recall PLU (item information) or Input Unit Price and Compute Price

There are 3 ways to recall PLU or input unit price.
When automatically recalling PLU is enabled (Default status when you get scale)

1) Press PLU \# to recall PLU. E.g.: Recall PLU 21. Its tare is 0.020 kg , unit price is $2.00 \mathrm{\$} / \mathrm{kg}$ and etc.

| Procedure | Description | Key operation | $\begin{gathered} \text { Display } \\ \text { on } 1^{\text {st }} \text { line } \end{gathered}$ | $\begin{aligned} & \text { Display on } 2^{\text {nd }} \\ & \text { line } \end{aligned}$ | Display on $3^{\text {rd }}$ line | Display on the bottom line | $\begin{gathered} \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step1 | Weighing mode |  | 0.000 | 0.00 | 0.00 | UT TILKET |  |
| Step2 | Recall PLU 21 | [2][1] | -0.020 | 2.00 | -0.04 | ${ }^{\text {² }} 21$ Рто.020Кธ | NET |
| Step3 | Calculate total price | Put on items | 1.000 | 2.00 | 2.00 | ${ }^{\text {² }} 21$ Рто.020Ки | MET |

2) Input the unit price manually

To by weight type item, e.g. input a unit price $2.00 \$ / \mathrm{kg}$ 。

| Procedure | Description | Key operation | $\begin{aligned} & \text { Display } \\ & \text { on } 1^{11} \text { line } \end{aligned}$ | $\begin{array}{\|c\|} \hline \begin{array}{c} \text { Display on } 2^{\text {nd }} \\ \text { line } \end{array} \\ \hline \end{array}$ | $\begin{array}{\|c} \hline \text { Display on } \\ 3^{4 d} \text { line } \end{array}$ | Display on the bottom line | $\begin{gathered} \mathrm{Lit}_{\mathrm{Lit}} \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Stepl | Weighing mode |  | 0.000 | 0.00 | 0.00 | MI THKET |  |
| Step2 | Input unit price | [PLU][2][0][0] | 0.000 | 2.00 | 0.00 |  |  |
| Step3 | Calculate total price | Put on items | 1.000 | 2.00 | 2.00 |  |  |

To by count type item, e.g. input a unit price $2.00 \$ /$ PCS

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 1^{\text {st line }} \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \end{gathered}$ | $\begin{array}{c\|} \hline \text { Display } \\ \text { on } 3^{\text {d }} \text { line } \end{array}$ | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{array}{\|c} \hline \text { Lit } \\ \text { cursor } \end{array}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step1 | Weighing mode |  | 0.000 | 0.00 | 0.00 | UT TICKET |  |
| Step2 | Input the price value: 2.00\$ | [PLU][2][0][0] | 0.000 | 2.00 | 0.00 |  |  |
| Step3 | Initiate the by count mode and get price | [x] | CM | 2.00 | 2.00 |  | $\underline{ }$ |
| Step4 | Calculate the total price of 3 items | [3] | CH 3 | 2.00 | 6.00 |  | $x$ |

## RS Series Service Manual

When PLU is recalled by PLU key (which can be set in setting 403: by PLU key)

1) Press PLU \# and then key [PLU] to recall PLU. e.g. 21, its unit price is $2.00 \$ / \mathrm{kg}$, preset tare is 0.020 kg and etc.

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 1^{\text {st }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {d l line }} \end{gathered}$ | Display on the bottom line | $\begin{gathered} \text { Lit } \\ \text { cursor } \\ \hline \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step1 | Weighing mode |  | 0.000 | 0.00 | 0.00 | VI TICKET |  |
| Step2 | Recall PLU 21 | [2][1][PLU] | -0.020 | 2.00 | -0.04 | ${ }^{\text {sw } 21 ~ P T O .020 К G ~}$ | MET |
| Step3 | Calculate total price | Put on items | 1.000 | 2.00 | 2.00 | จ\% 21 PTO.020КG | HIET |

2) Input the unit price manually.

To by weight type item, e.g. input a unit price $2.00 \$ / \mathrm{kg}$ 。

| Procedure | Description | Key <br> operation | Display <br> on $1^{\text {st }}$ line | Display <br> on $2^{\text {nd }}$ line | Display <br> on $3^{\text {rd }}$ line | Display <br> on the bottom line | Lit <br> cursor |
| :---: | :--- | :--- | :---: | :---: | :---: | :---: | :---: |
| Step1 | Weighing mode |  | 0.000 | 0.00 | 0.00 |  |  |
| Step2 | Input the unit price $2.00 \$ / \mathrm{kg}$ | $[2][0][0]$ | 0.000 | 2.00 | 0.00 |  |  |
| Step3 | Calculate total price | Put on items | 1.000 | 2.00 | 2.00 |  |  |

To by count type item, e.g. input a unit price: 2.00\$/lPCS.

| Procedure | Description | Key operation | $\begin{gathered} \text { Display } \\ \text { on } 1^{\text {st }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \end{gathered}$ | $\begin{aligned} & \text { Display } \\ & \text { on } 3^{\text {dd }} \text { line } \end{aligned}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on the bottom line } \\ \hline \end{array}$ | $\begin{array}{\|c\|} \hline \text { Lit } \\ \text { cursor } \\ \hline \end{array}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step 1 | Weighing mode |  | 0.000 | 0.00 | 0.00 | UI TILKET |  |
| Step2 | Input the price value: $2.00 \$$ | [2][0][0] | 0.000 | 2.00 | 0.00 |  |  |
| Step3 | Initiate the by count mode and get price | [x] | CM 1 |  | 2.00 |  | $x$ |
| Step4 | Calculate the total price of 3 items | [3] | CH 3 | 2.00 | 6.00 |  | $\chi$ |

*s Recall information with scanner
e.g. recall the information of one bag of wash powder, its PLU \# is 8, and item \# is printed on the bag

| Procedure | Description | Key operation | $\begin{gathered} \text { Display } \\ \text { on } 1^{\text {st line }} \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \end{gathered}$ | Display on $3^{\text {rd }}$ line | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{gathered} \hline \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Weighing mode |  | 0.000 | 0.00 | 0.00 | VI TICKET |  |
| Step2 | Scan bar code and get its information |  | -0.020 | 2.00 | 0.00 | su 21 PT 0.020KG | MET |
| Step3 | Calculate total price | Put on items | 1.000 | 2.00 | 2.00 | ${ }^{\text {sw }} 21$ PTO.020月G | MET |

In weighing mode, if the scanner can not scan the bar code on the bag, you may input the item number manually to recall the item information by pressing key [PLU], item number, and then [PLU] key.

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on } 1^{\text {st }} \text { line } \\ \hline \end{array}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \\ \hline \end{array}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{d d} \text { line } \\ \hline \end{gathered}$ | $\begin{array}{\|c\|} \text { Display } \\ \text { on the bottom line } \\ \hline \end{array}$ | $\begin{gathered} \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step1 | Weighing mode |  | 0.000 | 0.00 | 0.00 | UT TICKET |  |
| Step2 | To recall item information through item \#. | $\begin{aligned} & {[\mathrm{PLU}][1][2][3][4][5][6]} \\ & {[\mathrm{PLU}]} \end{aligned}$ | Cy 1 | 2.00 | 2.00 | ${ }^{\text {w }} 21$ |  |
| Step3 | Calculate the total price of 3 items | [x][3] | CM 3 | 2.00 | 6.00 | * 21 | $x$ |

### 4.6 Operation in Ticket Printing Mode

### 4.6.1 Print Ticket

For Example: One customer buys 2 items, PLU1 ( 0.5 kg ) and PLU6 (2 PCS), the procedure to print ticket is as follows:

| Procedure | Description | Key operation | Display on $1^{\text {st }}$ line | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \end{gathered}$ | $\begin{aligned} & \text { Display } \\ & \text { on } 3^{\text {rd }} \text { line } \end{aligned}$ | Display on the bottom line | $\begin{gathered} \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step1 | Ready for weighing |  | 0.000 | 0.00 | 0.00 | LI TICKET |  |
| Step2 | Recall PLU1 | [1] | 0.000 | 9.80 | 0.00 | ${ }^{\text {a }} 1$ |  |
| Step3 | Put the item 1 on the platter |  | 0.500 | 9.80 | 4.90 | ${ }^{\text {¢ }} 1$ |  |
| Step4 | Accumulate this transaction into subtotal of V 1 . V1 means vendor 1, P1 means 1 transaction, A4.90 means the amount subtotal is $4.90 \$$ | [V1] | 0.500 | 0.00 | 0.00 | V7P18 4.90 |  |
| Step5 | Remove item1 away from the platter and recall PLU3 | [3] | CM 1 | 3.36 | 3.36 | ${ }^{\text {a/ }} 3$ |  |
| Step6 | Put the item 2 on the platter | [x]2 | ciy 2 | 3.36 | 6.72 |  |  |
| Step7 | Subtotal, now has 2 transactions, amount is 11.62 | [V1] | 0.000 | 0.00 | 0.00 | V1P28 11.62 |  |
| Step8 | Show total amount | [*] | 27 | TOTRL | 17.62 | P9y 11.62 |  |
| Step9 | Input the cash paid by customer | [1][2][0][0] | $\nu 7$ | TOTRL | 71.62 | P993 12.00 |  |
| Step 10 | Show change and print ticket | [*] | Li | TOTRL | 71.62 | CHANGE 0.38 |  |

In setting item 222, the change function can be disabled. In this case in step 8, after [*] is pressed, the ticket will be printed directly.

## Notice

- If total amount is more than 7 digits, character V on the right will disappear and the total amount will be shown as "nnnnnnn"
- When ticket printing is not finished, but the paper is used up, please install a new paper roll, then press [*] to print the ticket again.
In total amount display mode, the following operation will return the scale back to weighing mode.
ws Input PLU number
* Press tare
- Press key [C]

The format sample of the ticket is listed below:

### 4.6.2 Multi-payment Way

Enable multi-payment way first as follows:

| Procedure | Descripition | $\begin{gathered} \text { Ky } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on 1st line } \end{gathered}$ | Display on | Display on 3 rd line | $\begin{gathered} \text { Display } \\ \text { On the bottom line } \end{gathered}$ |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Stepl | In weigh mode |  | 0.000 | 0.00 | 0.00 | LITCKET |  |
| Step2 | Waiting to insert ID code | [Mode] [2] |  |  |  | SETUP/5HIFT |  |
| Step3 | Insert manager's id code [2] |  |  |  |  | PU |  |
| Step4 | Insert manager's password | [6][6][6][6][6][6]] |  |  |  | PU****** |  |
| Step5 | Access to setup mode, in group 1 | [*] | 6807 |  | .-...- | INFO INPUT |  |
| Step6 | Access to setting item 443 | [4][4][3] | 5443 |  | ------ | MULT-PRY |  |
| Step7 | Default is to only use cash for payment | [*] | 5443 |  | 0 | CRSH OMLS |  |
| Step8 | Select multi-payment way | $[\rightarrow \mathrm{T} \leftarrow]$ | 5443 |  | 1 | MULT-PRY |  |
| Step9 | Confirm selection and go to next step | [*] | 5407 |  | ------ | Restore def |  |
| Stepl0 | Return scale to weighing mode | [Mode][Mode] | 0.000 | 0.00 | 0.00 | LI TICKET |  |

After multi-payment way takes effect, the following 3 keys will be automatically defined as payment key:
[Y]: Voucher key
[Z]: Credit card key
[ ${ }^{1}$ ]: Cheque key
At this time, including cash key [*], there are 4 keys for payment.
a) Use credit card for payment operation

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{array}{\|c} \text { Display } \\ \text { on 1st line } \end{array}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on 2nd line } \\ \hline \end{array}$ | $\begin{gathered} \text { Display } \\ \text { on 3rd line } \end{gathered}$ |  | $\begin{gathered} \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| ------ | Have done 2 transactions | ------[V1] | 0.000 | 0.00 | 0.00 | V1P2R 17.62 |  |
| next | Print ticket directly no matter "change function" is | [Z] | $\mathrm{V} /$ | TOTRL | 71.62 | 3 CREDIT CRRD |  |

| $\begin{array}{l}\text { enabled or not, and show "2 crediit card" to indicate } \\ \text { it is paid by credit card. Don't open cash as well }\end{array}$ |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |

On the ticket credit card will be printed on the left of the paid amount as follows:
Credit card 11.62
b) Use cheque for payment operation

| Procedure | Description | Key operation | $\begin{array}{\|c} \hline \text { Display } \\ \text { on 1st line } \\ \hline \end{array}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on 2nd line } \\ \hline \end{array}$ | $\begin{array}{\|c} \hline \text { Display } \\ \text { on 3rd line } \\ \hline \end{array}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { On the bottom line } \\ \hline \end{array}$ | $\begin{gathered} \hline \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| --- | Have done 2 transactions | ------[V1] | 0.000 | 0.00 | 0.00 | L7 PER 11.62 |  |
| next | Print ticket directly no matter "change function" is enabled or not, and show "3 cheque" to indicate it is paid by credit card. Don't open cash as well | [ ${ }^{\text {] }}$ | m | TOTRL | 17.62 | 3 CHEQUE |  |

On the ticket cheque will be printed on the left of the paid amount as follows:
Cheque 11.62
3) Use voucher for payment operation

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on 1st line } \\ \hline \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on 2nd line } \\ \hline \end{array}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on 3rd line } \end{array}$ | $\begin{gathered} \text { Display } \\ \text { On the bottom line } \\ \hline \end{gathered}$ | $\begin{array}{\|c} \hline \text { Lit } \\ \text { cursor } \end{array}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| ------ | Have done 2 transactions | ------[V1] | 0.000 | 0.00 | 0.00 | V7per 17.62 |  |
| next | No matter "change function" is enabled or not, press voucher key to get into total display mode | [Y] | Vi | TOTRL | 71.62 | VP9Y 11.62 |  |
| next | Input voucher value 12.00€ | [1][2][0][0] | 27 | TOTRL | 71.62 | 1989312.00 |  |
| next | * Press cash key to give cash change and print ticket | [*] | Vi | TOTRL | 17.62 | [CHG 0.38 |  |

On the ticket voucher will be printed on the left of the paid amount as follows:
Voucher 12.00
Cash change 0.38

* If press voucher key $[\mathrm{Y}]$ at this time, the change will be voucher also, the display will be as follows:

On the ticket printed content will be as follows:
Voucher 12.00
Voucher change 0.38
If input amount of voucher is less than total, the operation procedure is as follows:

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 1 \text { st line } \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on 2nd line } \\ \hline \end{array}$ | $\begin{gathered} \text { Display } \\ \text { on 3rd line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { On the bottom line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| ------ | Have done 2 transactions | -----[V1] | 0.000 | 0.00 | 0.00 | \#1928 11.62 |  |
| next | Input voucher value 10.00€ | [Y][1][0][0][0] | 17 | TOTRL | 71.62 | VP9Y 10.00 |  |
| next | * Press cash key [*] to pay the remained by cash | [*] | $\nu 7$ | REMRIIM |  | [P93 1.52 |  |
| next | Input cash value $2.00 €$ | [2][0][0] | $\nu$ | REMRIIH |  | [P9Y 2.00 |  |
| next | Press cash key to give cash change and print ticket | [2][0][0] | Vi | TOTRL |  | C CHG 0.38 |  |

* Other payment key can be used at this time.

One example of the printed content is as follows:
Voucher 10.00
Cash 2.00
Cash Change 0.38
Or:
Voucher 10.00
Credit card: 1.62

### 4.6.3 Multi-vendor Operation

Vendor quantity (up to 4) can be set in setting item 409. If one vendor operates the scale, and one vendor wants to recall his own total when another vendor's total is displayed on the bottom line, the procedure is as follows:
When only bottom line has content, the other lines are blank.

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | Display on $1^{\text {st }}$ line | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \end{gathered}$ | Display on $3^{\text {rd }}$ line | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{gathered} \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| ------ | Only on bottom line shows V1's total |  |  |  |  | V1PER 11.62 |  |
| Step 1 | Press [V2] to recall V2's total | [V2] |  |  |  | VEP1R 5.62 |  |
| Step2 | Show V2's total amount and print his ticket | [*] | V2 | TOTRL | 71.62 |  |  |

When unit price is not zero

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on } 1^{\text {st line }} \\ \hline \end{array}$ | $\begin{aligned} & \text { Display } \\ & \text { on } 2^{\text {nd }} \text { line } \end{aligned}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{d r} \text { line } \\ \hline \end{gathered}$ | Display on the bottom line | $\begin{array}{\|c\|} \hline \text { Lit } \\ \text { cursor } \end{array}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| ------ | Vendor 1's total is shown on the bottom line |  | 0.400 | 16.80 | 6.72 | リP29 11.62 |  |
| Step 1 | Clear unit price or PLU | [C] | 0.400 | 0.00 | 0.00 | リP2 11.62 |  |
| Step2 | Press [V2] to recall V2's total | [V2] |  |  |  | VEP1R 5.62 |  |
| Step3 | Show V2's total amount and print his ticket | [*] | VL | TOTRL | 71.62 |  |  |

### 4.6.4 Print Copy of the Ticket

In setting item 206, printing a copy of ticket can be set to enable. In this case, after printing the ticket, press [*] again, a copy of the ticket will be printed, and characters "COPY" will be shown on that ticket.

### 4.6.5 Save Ticket

In order to save a ticket, in setting item 203, you may select to accumulate transactions and not print the ticket.. This setting item has 3 parameters as follows:

0: print ticket: print ticket
1: No ticket: don't print ticket
2: Ticket: you may select whether to print or not
When parameter 2 is selected, after [*] is pressed, the procedure will be as follows:

| Procedure | Description | Key operation | $\begin{gathered} \hline \text { Display } \\ \text { on } 1^{\text {st }} \text { line } \end{gathered}$ | Display on $2^{\text {nd }}$ line | Display On $3^{\text {rd }}$ line | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{gathered} \hline \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| ------ | Show V2's subtotal |  | VE | TOTRL | 71.62 |  |  |
| Step1 | Default is to print ticket | [*] | V1 | TOTRL | 71.62 | PRN T TICKET |  |
| Step2 | Select not to print ticket | $[\rightarrow T<]$ | V7 | TOTRL | 17.62 | MO TICKET |  |
| Step3 | Don't print ticket | [*] | 0.000 | 0.00 | 0.00 | UI TICKET |  |

### 4.6.6 Ticket Format

The default is to print discount price as follows:

| Ling Discount |  |  |
| :---: | ---: | ---: |
| $10 \%$ |  |  |
|  |  |  |
|  | 2.000 | 2.50 |
|  | 2.25 |  |

If you want to use the below format, you may find it in setting item 229 by selecting parameter 0 (DISC UP/TP).

|  |  |  |  |  |
| ---: | ---: | ---: | :---: | :---: |
| Ling Discount |  |  |  |  |
|  | $10 \%$ |  |  |  |
|  | 2.000 | 2.50 |  |  |
|  | 2.25 | 2.25 |  |  |

### 4.6.7 Suspend Transactions

One vendor can suspend transactions one time. The procedure to suspend or recall suspended transactions is as follows:

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{aligned} & \text { Display } \\ & \text { on } \mathrm{s}^{\text {st }} \text { line } \end{aligned}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \\ \hline \end{gathered}$ | $\begin{aligned} & \text { Display } \\ & \text { on } 3^{\text {rd }} \text { line } \\ & \hline \end{aligned}$ | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{gathered} \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| --- | Accumulate one transaction to subtotal | [V1] | 0.500 | 0.00 | 0.00 | V1P2R 11.62 |  |
| Step1 | Remove items. Initiate suspend function | [MODE]+[ ${ }^{\mathbb{D}}$ ] | 0.000 | 0.00 | 0.00 | SUSPEMD |  |
| Step2 | Suspend the transaction of V1. Two continuous beeps will indicate suspend finished | [V1] | 0.000 | 0.00 | 0.00 | SUSPEMD U7 |  |
| Step3 | V1 may begins treating another customer | [1] | 0.000 | 9.80 | 0.00 | ${ }^{\text {W }} 1$ |  |
| Step4 |  | ----- |  |  |  | V7 P3 88.50 |  |
| Step5 | Print the ticket | [*] | 17 | TOTRL | 8.50 |  |  |
| Step6 | Recall the suspended transactions | [MODE]+[ ${ }^{\text {d }}$ ] | 0.000 | 0.00 | 0.00 | SUSPEMD |  |
| Step7 | Recall V1's suspended transactions, then V1 can continuously treat that customer | [V1] | 0.000 | 0.00 | 0.00 | V1P2 17.62 |  |
| Step8 | Print the ticket | [*] | 27 | TOTRL | 71.62 |  |  |

If one vendor has the suspended transactions and the current subtotal of this vendor is not zero, when you press
[MODE]+[ $\oplus$, "no more susp" will be shown for 1 second to indicate that this operation will be invalid.

### 4.6.8 Void Transaction

Before ticket is printed, any transactions can be cancelled.
For example: One customer bought 2 items, PLU 1: 0.5 kg , and PLU 3: 0.4 kg . Before ticket was printed, he wanted to cancel PLU 1. The procedure is as follows:

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 1^{\text {st }} \text { line } \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on } 2^{\text {nd }} \\ \hline \end{array}$ | Display on $3^{\text {rd }}$ line | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on the bottom line } \end{array}$ | $\begin{gathered} \hline \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step1 | Weighing mode |  | 0.000 | 0.00 | 0.00 | UI TICKET |  |
| Step2 | Recall PLU1 | [1] | 0.000 | 9.80 | 0.00 | ${ }^{\text {w }} 1$ |  |
| Step3 | Put item on the platter |  | 0.500 | 9.80 | 4.90 | ${ }^{\text {su }} 1$ |  |
| ----- | Two transactions were finished |  | 0.500 | 0.00 | 0.00 | MPER 11.62 |  |
| next | Default to cancel the last transaction, here is PLU 3 | [VOID] | 0.500 | -9.80 | -4.90 | PLU3 VOIO |  |
| next | Use [ $\uparrow$ ] or [ $\downarrow]$ to select the transaction needed | [ $\uparrow$ | 0.500 | -9.80 | -4.90 | PLU 1 VOID |  |
| next | Confirm to void PLU1 and go back to weighing mode | [*] | 0.500 | 0.00 | 0.00 | VIP18 4.62 |  |

### 4.6.9 Cancel All Transactions

Before the ticket is printed, all transactions of one vendor can be cancelled. Notice, do not cancel the pending transaction of this vendor.
E.g.: One customer bought 4 items, then decided not to purchase before the ticket was printed. The following procedure will cancel the transaction:

| Procedure | Description | Key operation | Display on $1^{\text {st }}$ line | Display on $2^{\text {nd }}$ line | Display on $3^{\text {rd }}$ line | Display on the bottom line | $\begin{gathered} \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| -- | 4 transactions had been accumulated | [V1] | 0.000 | 0.00 | 0.00 | 1794844.90 |  |
| Step 1 | Cancel the last transaction | [Void] | 0.400 | $-16.80$ | $-6.72$ | PLU3 VOID |  |
| Step2 | Cancel all transactions, and print void ticket | [V1] |  |  |  | VOIU RLL |  |
| Step3 | 1 second later scale goes back to weighing mode |  | 0.00 | 0.00 | 0.00 | WI TICKET |  |

### 4.6.10 ST

After ticket is printed, items can be refunded.
One customer made a purchase and the printed ticket contains PLU2: $0.600 \mathrm{~kg}, 8.90 \$ / \mathrm{kg}$, total $5.34 \$$, and etc. The procedures to refund are as follows:

| Procedure | Description | Key operation | $\begin{gathered} \text { Display } \\ \text { On }^{s} \text { l line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{d d} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{gathered} \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step4 | Weighing mode |  | 0.000 | 0.00 | 0.00 | UT TICKET |  |
| Step5 | Initiate ST function, ST will shown in the bottom line | [MODE]+[ST] | 0.000 | 0.00 | 0.00 | UT TICKET | $5 T$ |
| Step6 | Recall PLU 2, but unit price is 10.80\$ | [2] | 0.000 | -10.80 | -0.00 | ${ }^{\text {w }}$ ? | $5 T$ |
| Step7 | Change unit price | [PLU][8][9][0] | 0.000 | -8.90 | 0.00 | ${ }^{2 \%}$ 已 | $5 T$ |
| Step8 | Put the item on the platter |  | 0.400 | -8.90 | -5.34 | ${ }^{2 w}$ ? | $5 T$ |
| Step9 | Accumulate this into total | [V1] | 0.500 | 0.00 | 0.00 | V17P $9-71.62$ | 51 |
| Step10 | Operate as normal transaction until finished |  |  |  |  |  |  |
| Step 11 | Print the ST ticket | [*] | H | TOTRL | -17.62 | -17.62 | $5 T$ |
| Step 12 | Return scale to sales mode | [*] | M | TOTRL | -71.52 | -71.62 | $5 T$ |

Pressing [MODE]+[ST] means pressing and holding [Mode] key, then pressing [ $\mathbb{D}$ ] key

## Notice

- The refunded items will be accumulated into Void/ST report only
- Only when subtotal and unit price is zero, the scale can exit ST mode and go back to sales mode by pressing [Mode]+[ $\mathbb{D}$ ]

### 4.6.11 Discount Operation

Discount operation is related to the following setting items:

| Setting item | 422 | 423 | 424 | 425 |
| :---: | :---: | :---: | :---: | :---: |
| Display | DISC KEY | DISC IDRO | DISC CHRNIGE | TEITP DISC |
| Description | Effecting of discount key | How to recall discount | [DISC] key change <br> discount edited in <br> setting item 116? | [DISC] set <br> discount of PLU <br> without edited <br> discount |

| Parameters | 0: Effect PLU and total <br> 1: Effect unit price only <br> 2: Effect total price only <br> 3: Disabled | 0: By discount key <br> 1: Takes effect <br> automatically | 0: Can change <br> $1:$ Can not change | 0: May set <br> $1:$ Can not set |
| :--- | :--- | :--- | :--- | :--- |
| Default <br> parameter | 0 | 0 | 1 | 0 |

For example: All related setting parameters are default, and one customer will buy two items:
PLU1: In S1 16, the set discount rate is $-12 \%$, unit price of PLU is $9.80 \$$, so the discounted unit price is $8.62 \$$.
PLU3: no discount set in S116. But $-15 \%$ will be input

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { On } 1^{\text {st line }} \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \end{gathered}$ | $\begin{aligned} & \hline \text { Display } \\ & \text { on } 3^{\text {rd line }} \end{aligned}$ | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{gathered} \hline \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step1 | Weighing mode |  | 0.000 | 0.00 | 0.00 | UT TICKET |  |
| Step2 | Recall PLU1 | [1] | 0.000 | 9.80 | 0.00 | ${ }^{\text {® }} 1$ |  |
| Step3 | Put the item on the platter |  | 0.500 | 9.80 | 4.90 | ${ }^{\text {® }} 1$ |  |
| Step4 | Discount takes effect | [DISC] | 0.500 | 8.62 | 4.31 | ${ }^{\text {®\% }} 1$ |  |
| Step5 | Accumulate transaction | [V1] | 0.500 | 0.00 | 0.00 | V1918 4.37 |  |
| Step6 | Remove item away from platter, and recall PLU3 | [3] | 0.000 | 15.80 | 0.00 | PLU 3 |  |
| Step7 | Please input the discount rate | [DISC] | 0.000 | 15.80 | 0.00 | DISC 0.00\% |  |
| Step8 | Input discount rate: -15\% | [1][5] | 0.000 | 14.28 | 0.00 | D15C-15\% |  |
| Step9 | Put the item on the platter |  | 0.400 | 14.28 | 5.71 | \% 3 |  |
| Step10 | Accumulate transaction | [V1] | 0.400 | 14.28 | 5.71 | 27P2 10.02 |  |
| Stepl1 | Print ticket | [*] | 17 | TOTRL | 710.02 |  |  |

4.6.12 Rebate

Rebate will be valid only on total amount. The related setting items are as follows:

| Setting item | 431 | 432 | 433 | 434 |
| :---: | :---: | :---: | :---: | :---: |
| Display | DEFPULL CLIT | CUT EFFECT | CUT KEY | CUT CHANIGE |
| Description | Default rebate of total price | Default rebate becomes effect? | Key [-] enabled? | Key [-] can change default rebate? |
|  | 0: No rebate <br> 1: Delete decimal fraction <br> 2: Keep one digit decimal fraction <br> 3: Keep two-digits decimal fractions | 0 : Become effect after $[-]$ is pressed <br> 1: Become effect automatically | 0: Enabled <br> 1: Disenabled | 0 : Can not change <br> 1: Can change |
| Default | 0 | 0 | 0 | 0 |

The procedures are as follows if all parameters are default:

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | Display $\text { on } 1^{\text {st }} \text { line }$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \end{gathered}$ | $\begin{aligned} & \hline \text { Display } \\ & \text { on } 3^{\text {d d line }} \end{aligned}$ | $\begin{array}{\|c} \hline \text { Display } \\ \text { on the boftom line } \end{array}$ | $\begin{gathered} \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| ------ | Weighing mode |  | L7 | TOTRL | 17.62 | P9y 11.52 |  |
| Step1 | The cent is deleted automatically | [-] | V7 | TOTRL | 17.60 | CUT S-0.02 |  |
| Step2 | Can not change the set rebate | [1][6][2] | $\nu 1$ | TOTRL | 10.00 | MO FLIMETIDM |  |
| Step3 | Default shows payment is the same as total amount | [*] | V7 | TOTRL | 10.00 | P93 10.00 |  |
| Step4 | Print ticket and show change | [*] | V7 | TOTRL | 10.00 | CHRMGE 0.00 |  |

### 4.6.13 Discount Card

Discount card is only valid for the total amount of the purchase. The same percentage will be discounted off the total amount. Once information of card is scanned, key [DISC] will be disabled. The card must be scanned before transaction, then all operation will be as normal, and discount rate will take effect automatically.

### 4.7 Operation in Label Printing Mode

### 4.7.1 Acess to Label Printing Mode

To set the scale to print labels:

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on } 1^{\text {st }} \text { line } \\ \hline \end{array}$ | Display on $2^{\text {nd }}$ line | Display on $3^{\text {rd }}$ line | Display on the bottom line | $\begin{aligned} & \text { Lit } \\ & \text { cursor } \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step 1 | In ticket printing mode |  | 0.000 | 0.00 | 0.00 | VT TICKET |  |
| Step2 | Please input ID \# | [Mode] |  |  |  | SETUP/SHIFT |  |
| Step3 | Input ID \# 1 and password | [1][8]8[]8[]8][8][8] |  |  |  | Pl\|****** |  |

|  | 888888 |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step4 | Access to setting 202 | [*][2][0][2] | 5202 |  | --- | PRIIV TSPE |  |
| Step5 | Default is to print ticket | [*] | 5202 |  | 0 | PRIMTIMG TICKET |  |
| Step6 | Select to print label | $[\rightarrow T \leqslant]$ | 5202 |  | 1 | PRIMTIMG LREEL |  |
| Step7 | Confirm and access to next item | [*] | 5203 |  | ------- | PRIINT? |  |
| Step8 | Go back to weighing mode | [Mode][Mode] | 0.000 | 0.00 | 0.00 | $1718 B E L$ |  |

### 4.7.2 Print Label

| Procedure | Description | Key operation | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on } 1^{\text {st }} \text { line } \end{array}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \end{gathered}$ | $\begin{aligned} & \text { Display } \\ & \text { on } 3^{\text {rd }} \text { line } \end{aligned}$ | Display on the bottom line | $\begin{gathered} \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step 1 | Weighing mode |  | 0.000 | 0.00 | 0.00 | $177188 E 1$ |  |
| Step2 | Recall PLU1 | [1] | 0.000 | 9.80 | 0.00 | PL 1 |  |
| Step3 | Put item on the platter |  | 0.500 | 9.80 | 4.90 | ${ }^{\text {¢ }} 1$ |  |

When press vendor key, there are 3 available results depending setting item 214.

1) When select parameter 0 : Print label, but the transaction will not be accumulated

| Step4 | Print label | $[\mathrm{V} 1]$ | 0.500 | 9.30 | 4.30 | $P L U 1$ |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

2) When select parameter 1: Print label and the transaction will be accumulated, then press [*] may show Subtotal, and print total label.

| Step4 | Print label of this transaction | $[\mathrm{V} 1]$ | 0.500 | 9.80 | 4.90 | 17978 | 4.90 |
| :--- | :--- | :--- | :---: | :---: | :---: | :---: | :---: |
| Step5 | Print total label | $\left[\left[^{*}\right]\right.$ | V7 | T0TRL | 17.62 |  |  |

3) When select parameter 2: Don't print label, but the transaction will be accumulated, and press [*] may show total amount, and print total label.

| Step4 | Don't print label | [V1] | 0.500 | 9.80 | 4.30 | V1978 4.90 |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step5 | Print total label | [*] | VII | TOTRL | 11. |  |  |

Other operations in label printing mode are same as in the ticket printing mode.

### 4.7.3 Label Format

104\#: $35 \times 50 \mathrm{~mm}$

102\#: $40 \times 50 \mathrm{~mm}$

105\#: $20 \times 40 \mathrm{~mm}$

103\#: $35 \times 50 \mathrm{~mm}$

| Step6 | Exit setting mode and go back to weighing mode | [Mode][Mode] | 0.000 | 0.00 | 0.00 | UT TICKET | Prepack |

### 4.8.2 Prepack in Ticket Printing Mode

| Procedure | Description | Key operation | Display on $1^{\text {st }}$ line | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \end{gathered}$ | Display on $3^{\text {rd }}$ line | Display on the bottom line | Lit cursor |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step 1 | Weighing mode |  | 0.000 | 0.00 | 0.00 | VI TICKET | Prepack |
| Step2 | Recall by count type PLU 1 | [1] | [iy 1 | 2.00 | 2.00 | ${ }^{\text {w }} 1$ | Prepack |
| Step3 | Accumulate transaction to V1 | [V1] | CM 1 | 2.00 | 2.00 | V1P182.00 | Prepack |
| Step4 | Recall by weight type PLU 2 | [2] | 0.000 | 3.00 | 0.00 | ${ }^{\text {¢\% }}$ ? | Prepack |
| Step5 | Put the item on the platter |  | 1.000 | 3.00 | 3.00 | ${ }^{\text {¢ }}$ ? | Prepack |
| Step6 | Accumulates transaction to V 1 automatically when weight becomes stable |  | 1.000 | 0.00 | 0.00 | V1 P2 5.00 | Prepack |
| Step7 | Print the ticket | [*] | V1 | TOTAL | 5.00 |  |  |

### 4.8.3 Prepack in Label Printing Mode

To by weight type PLU, prepack operation is as follows:

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 1^{\text {st }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \end{gathered}$ | $\begin{aligned} & \text { Display } \\ & \text { on } 3^{\text {ch line }} \end{aligned}$ | $\begin{gathered} \text { Display } \\ \text { on the boftom line } \end{gathered}$ | $\begin{gathered} \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step 1 | Weighing mode |  | 0.000 | 0.00 | 0.00 | $1718 B E L$ | Prepack |
| Step2 | Recall by weight type PLU 2 | [2] | 0.000 | 3.00 | 0.00 | ${ }^{\text {ew }} 2$ | Prepack |
| Step3 | Put the item on the platter |  | 1.000 | 3.00 | 3.00 | ${ }^{\text {su }}$ 己 | Prepack |
| Step4 | Print the label and accumulate transaction to V1 automatically when weight becomes stable |  | 1.000 | 3.00 | 3.00 | ${ }^{\text {aw }} 2$ | Prepack |

To by count type PLU, prepack operation is as follows:

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } \mathrm{s}^{s} \text { line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \end{gathered}$ | $\begin{aligned} & \hline \text { Display } \\ & \text { on } 3^{\text {rd line }} \\ & \hline \end{aligned}$ | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{gathered} \hline \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step 1 | Weighing mode |  | 0.000 | 0.00 | 0.00 | UT TICKET | Prepack |
| Step2 | Recall by count type PLU 1 | [1] | CM 1 | 2.00 | 2.00 | ${ }^{\text {u }} 1$ | Prepack |
| Step3 | Please input the label quantity | [*] | CH 1 | 2.00 | 0 | LRBEL QTS 0 | Prepack |
| Step4 | Input the label quantity 8 | [8] | CM 1 | 2.00 | 8 | LPBEL ATY 8 | Prepack |
| Step5 | Show the quantity of the printed label | [*] |  |  |  | PRIITTIME 5 |  |

| Step6 | Go back to weighing mode when finished |  | 0.000 | 0.00 | 0.00 | Prepack |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

### 4.9 Large Sale

If the weight of item to be weighed is more than the scale's capacity, you may input its weight value in large sale mode The following shows how to get into and operate in large sale mode.

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 1^{\text {st }} \text { line } \\ \hline \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { On 2nd } \\ \hline \end{array}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {d d line }} \\ \hline \end{gathered}$ | $\qquad$ | $\begin{gathered} \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step1 | Weighing mode |  | 0.000 | 0.00 | 0.00 | UT TILKET |  |
| Step2 | Recall PLU1 | [1] | 0.000 | 2.00 | 0.00 | 1 |  |
| Step3 | Initiate large sale mode | [MODE]+[LS] | 0.000 | 2.00 | 0.00 | ${ }^{\text {av }} 1$ | LS |
| Step4 | Input the weight value: 35.000 kg | [3][5][0][0][0] | 35.000 | 2.00 | 70.00 | ${ }^{\text {aU }} 1$ | LS |
| Step5 | Accumulate transaction | [V1] | 0.000 | 0.00 | 0.00 | V7P18 75.00 |  |
| ------ | Continue other transactions |  |  |  |  |  |  |

### 4.10100 g Function

When setting 4 xx is enabled this means 100 g is enabled. Operation related 100 g function is as follows:

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } \mathrm{s}^{\text {st }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \end{gathered}$ | $\begin{aligned} & \text { Display } \\ & \text { on } 3^{\text {rd }} \text { line } \end{aligned}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on the bottom line } \end{array}$ | $\begin{array}{\|c\|} \hline \text { Lit } \\ \text { cursor } \\ \hline \end{array}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| ------ | In weighing mode, recall PLU3 |  | 1.000 | 2.00 | 2.00 | ${ }^{\text {su }} 3$ |  |
| Step1 | The weight unit of unit price changes to 100 g | [MODE]+[100g] | 1.000 | 0.200 | 2.00 | ${ }^{\text {aw }} 3$ | 100g |
| Step2 | The weight unit of unit price changes to kg | [MODE]+[100g] | 1.000 | 2.00 | 2.00 | คu 3 |  |

On ticket or label, weight unit of unit price is kg only, no 100 g , even 100 g can be shown.

### 4.11 Show Data and Time

## Sleep mode

If there is no key operation or weight change for about 3 minutes, the scale will go to sleep mode. At this time, the time and date will show on the display. This mode will save power. When the weight changes or any key is pressed, the scale will go back to weighing mode immediately.
Show date/time
At any time, you may toggle between displaying date and time, or back to weighing mode by following the operation below:

| Procedure | Description | Key <br> operation | Display <br> on $1^{s t}$ line | Display <br> on $2^{\text {nd }}$ line | Display <br> on $3^{\text {d }}$ line | Display <br> on the bottom line | Lit <br> cursor |
| :---: | :--- | :--- | :---: | :---: | :---: | :---: | :---: |
| Step1 | Weighing mode |  | 0.000 | 0.00 | 0.00 | V/ TICKET |  |
| Step2 | Show date and time | [Mode]+[Disc] |  | $08: 08: 00$ | $04-00-18$ |  |  |
| Step3 | Back to weighing mode | [Mode]+[Disc] | 0.000 | 0.00 | 0.00 | V/ TICKET |  |

### 4.12 Backlight

Scale is equipped with a backlight for the display. If ambient lighting conditions are not sufficient, the backlight can be switched on to easily read the display.
To activate backlight, press and hold [C] key until a long beep is heard and the backlight turns on.
Use the same procedure to switch the backlight off, or simply turn the scale off.
When the scale is powered by battery, and not used for 1 minute, the backlight will automatically switch off. When weight is placed on the platter or a key is pressed, the backlight will switch on again.
When the power is AC power, the backlight will always be on.

## 5 Setup

Below is a description of all setting groups in the setup mode that be operated by the customer. A password is needed to access the set up mode. Once in set up mode, the authority given by the password will allow certain setting items to be edited.

### 5.1 Key Function in Setup Mode

| Key | Function |
| :---: | :---: |
| [Mode/ $\uparrow$ ] | Setup mode key to access to or exit setup mode; |
| [ x ] | Go back to last step |
| $[\rightarrow T \leqslant]$ | Select parameter in one setting item, or go forward to next setting or next group |
| [*] | Enter key to confirm the selection and go to next step |
| [C] | Clear |
| [0]~[9] | Number key to Insert number |
| [A] $\sim$ [Z] | Insert capital letter: A~Z <br> Insert the Lower case lefters: a~z <br> Insert punctuations: e.g. [, ], ? and so on |
| [ $\mathrm{c}^{2}$ ] | Switch among capital, small letter and punctuation modes |
| [ ${ }^{\text {] }}$ | Move cursor left to previous character |
| [ ${ }^{\text {] }}$ | Move cursor right to next character |
| [.] | Insert space |
| [ $\downarrow$ ] | Get the weight or go to the next line of the text |
| [ $\uparrow$ ] | Go to the last line of the text |

### 5.2 Quick Key (on-the-fly function)

### 5.2.1 Quick Key Location

Quick keys are preseted in the left 30 keys. The location is as follows:

| PLU Edit | Print Promotion | Settle Amount | Group Report | Sales /Prepack | Quick Key List |
| :---: | :---: | :---: | :---: | :---: | :---: |
| PLU Price Change | Discount Edit | Combinati on Report | Group Hourly Report | Void/ST <br> Report | Internal Parameter |
| Group Edit | Raffle Edit | Sales Report | Promotion Report | Weekly Report |  |
| Purchase Edit | Gift Edit | PLU Report | Vendor Report | Delete Reports | Paper Test |
| Inventory Checking |  | Hourly Report | Purchase <br> /Inventory <br> /Sales Report | Delete All Reports | Paper Out |

### 5.2.2 Function of the Quick Key

## 4 Function quick key

[Quick key list]: Press [Mode] and this key to print the location of all quick keys.
[Internal parameter]: Press [Mode] and this key to print the internal parameters of the scale.
[Test paper]: Press [Mode] and this key to test paper, especially test label.
[Paper out]: Press [Mode], and this key to print line by line until the paper is released by the scale.
(s) Printing quick key

Printing quick key includes various report quick keys and Print promotion. To print PLU report, please follow the steps below:

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { On } 1^{s} \text { line } \end{array}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \end{array}$ | $\begin{gathered} \hline \text { Display } \\ \text { On }^{3 d \mathrm{~d}} \text { line } \end{gathered}$ | Display on the bottom line | $\begin{gathered} \hline \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step1 | Weighing mode |  | 0.000 | 0.00 | 0.00 | L7 LSBEL |  |
| Step2 | Please press quick key | [Mode] |  |  |  | SETUP/SHIFT |  |
| Step3 | Press quick key | [PLU report] |  |  |  | 10 |  |
| Step4 | Insert ID \# and password | [1][8][8][8]8][8][8] |  |  |  | PW****** |  |
| Step5 | Print report and go back to weighing mode | $\left[{ }^{*}\right]$ | 0.000 | 0.00 | 0.00 | V7 188EL |  |

${ }^{*}$ Setup quick key
All quick keys, except of function quick keys and printing quick keys, are setup quick key. Their operation is as follows. E.g. Edit PLU

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | Display on $1^{\text {st }}$ line | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \\ \hline \end{array}$ | $\begin{gathered} \hline \text { Display } \\ \text { On } 3^{\text {rd }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{gathered} \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step 1 | Weighing mode |  | 0.000 | 0.00 | 0.00 | VI Lisel |  |
| Step2 | Please press quick key | [Mode] |  |  |  | SETUP/SHIFT |  |
| Step3 | Press quick key | [Edit PLU] |  |  |  | 10 |  |
| Step4 | Insert ID \# and password | [1][8]8[]8[]8][8][8] |  |  |  | PU****** |  |
| Step5 | Access to edit PLU setting item directly | [*] | 5107 |  | 1 | PLU MUMEER |  |
| ------ | Edit PLU |  |  |  |  |  |  |
| Step6 | Exit to weighing mode | [Mode] | 0.000 | 0.00 | 0.00 | VI LiBEL |  |

In setup mode, when " $G R X X$ " is shown on the $1^{\text {st }}$ line, press setup quick key or printing quick key, and scale will access the related setup item directly.

### 5.3 Acess to Setup Mode

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 1^{\text {st }} \text { line } \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \\ \hline \end{array}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {rd }} \text { line } \end{gathered}$ | Display on the bottom line | $\begin{gathered} \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step 1 | Ready to weigh |  | 0.000 | 0.00 | 0.00 | UT TILKET |  |
| Step2 | Waiting to insert ID code | [Mode] |  |  |  | SETUP/SHIFT |  |
| Step3 | Insert manager's id code [2] | [2] |  |  |  | PU |  |
| Step4 | Insert manager's password | [6][6][6][6][6][6] |  |  |  | PU ****** |  |
| Step5 | Access to setup mode, in group 1 | [*] | GR 01 |  | ------- | INFO IITPUT |  |

Notice: Wrong Id or password will return scale back to weighing mode.
If there is not a password for an ID code, access setup mode directly after that ID is entered.
Please refer to Group 8 "password" for detail.

### 5.3.1 Access to Some Item

After accessing setup mode, there are 3 ways to get to an item.

1) Insert item \# to get to an item.
2) Use $[\rightarrow T \leftarrow]$ and $[*]$ to get to an item.
3) Press quick key to get to an item.

With regard to item \#, please check the setting item list.
For example: to get to setting item 602
Insert item no. to get to setting item

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 1^{\text {st }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {rd }} \text { line } \\ \hline \end{gathered}$ | Display on the bottom line | $\begin{gathered} \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| ------ | In setup mode, "GR XX" is shown. e.g. "Gr 01" |  | GR 07 |  | ------- | INFOI INTPUT |  |
| Step 1 | Insert item \# | [6][0][2] | 5602 |  | ------ | SRLES REPDRT |  |
| Step2 | Access to item 602 directly | [*] | 5602 |  | 05-05-25 | T00RS |  |

Use keys [ $\rightarrow T \leftarrow$ ] and [*] to get to setting item

| Procedure | Description |  | $\begin{gathered} \text { Display } \\ \text { on } 1^{\text {st line }} \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \\ \hline \end{array}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {dd }} \text { line } \end{gathered}$ | Display on the bottom line | $\begin{array}{\|c} \mathrm{Lit}_{\text {cursor }} \end{array}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| --- | In setup mode, " GR XX " is shown. e.g. " Gr $01 "$ |  | GS 07 |  | ------ | IMFO IMPUT |  |
| Step 1 | Get to group 6 | $\begin{aligned} & {[\rightarrow T \leftarrow]} \\ & 5 \text { times } \end{aligned}$ | GR 06 |  | ------ | REPORT |  |
| Step2 | Access to 1st item (601) of group 6 | [*] | 5607 |  | ------ | RPT DEFRULT |  |

| Step3 | Select 2nd item (602) of group 6 | $[\rightarrow T<]$ | 5502 |  | $\cdots----$ | SRLES REPORT |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Step4 | Access to item 602 directly | $[*]$ | 5502 |  | $05-05-25$ | TODRS |  |

Press quick key to get to setting item

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } \mathrm{s}^{\text {st }} \text { line } \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \\ \hline \end{array}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {dd }} \text { line } \end{gathered}$ | $\begin{gathered} \hline \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { Lit } \\ \text { cursor } \end{array}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| --- | In setup mode, " $G R$ XX" is shown. e.g. " Gr $01 "$ |  | 6907 |  | ------- | INFO INPUT |  |
| Step 1 | Access to item 602 directly | [Sales report] | 5602 |  | 05-05-25 | T00RY |  |

### 5.3.2 Exit Setup Mode

Press [Mode] several times in setup mode to exit.

### 5.4 Setting Group

### 5.4.1 Data Entry (Group 1)

This group is used to insert all data for normal operation. The chart below contains all setting items in this group.

| Item \# | Shown on the display | Description |
| :---: | :---: | :---: |
| 101 | PLU EDIT | Edit PLU information |
| 102 | PRILE CHANGE | Change PLU price only |
| 103 | PLU COMTEMT | Set which items of PLU are visible |
| 104 | GROUP EEIT | Edit group information |
| 105 | VEMOOR EDIT | Edit vendor information |
| 106 | DRTE/TIME | Edit date and time |
| 107 | SHOP ESIT | Edit store name |
| 108 | SCRLE ME. | Edit scale \# |
| 109 | HEPD/FODTER | Edit header and footer of the ticket |
| 110 | EXTRA TEXT | Edit extra information |
| 111 | TRRE EOIT | Edit tare information |
| 112 | BAR CODE | Edit bar code format |
| 113 | BRR CVIS T/ | Edit relationship between bar code format and ticket/label/total label format |
| 114 | IMUEMTORY | Update Purchase information |
| 115 | SETTLE | Settle inventory |
| 116 | discount | Edit discount information |
| 117 | GIFT EDIT | Edit gift information |
| 118 | DISC CRRD | Edit discount card information |
| 119 | RAFFLE | Edit raffle information |
| 120 | PRM PROMOTE | Print promotion information |
| 121 | PRODUCT DRTE | Change production date |
| 122 | PRINT PLU | Print PLU list |

5.4.1.1 Edit PLU Information (Setting item 101)

## The structure of PLU

A PLU includes following 13 items:

1) PLU number
2) Unit price
3) BEST before
4) Item number
5) Quantity (by count type PLU only)
6) Label format \#
7) Description
8) Fix weight (by count type PLU only)
9) Extra text \#
10) Group number
11) Tare \#
12) Unit price type
13) Sell before

When editing a PLU, some items can be seen and some may not be seen. This depends on the setting in setting item 103. When an item is on in setting item 103, it can be edited in default mode. Only the following items may be edited:

- PLU
- Description
- Unit price type
- Unit price

## Edit PLU

E.g. Edit Berry's information

| PLU \# | Description | Unit price type | Unit price |
| :---: | :--- | :--- | :--- |
| 88 | Berry | By weight | $\$ 1.80 / \mathrm{kg}$ |
| 100 | Apple | By count | $\$ 0.5 /$ pcs |

| Procedure | Descripition | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } \text { s }^{s} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{n d} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{c d} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{aligned} & \mathrm{Lit}_{\mathrm{Lit}} \\ & \text { cursor } \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Stepl | In setup mode, "GR XX" is shown. e.g. "Gr 01" |  | GR Ol |  | --..-.- | mFO IMPUT |  |
| Step2 | Get to item 101 to edit PLU information | [1][0][1] | 5107 |  | ------- | PLU EDIT |  |
| Step3 | Begin to edit PLU. Please insert PLU \# | [*] |  |  | 1 | PLU MUMEER | 5107 |
| Step4 | Insert PLU\# 88, valid date is 1~9999 | [8][8] |  |  | 88 | PLU NUMEER | 107 |
| Step5 | Please insert description. L* means the insert lefters will be capital; 1 means insert character is the 1st character. | [*] | 1 | 1 |  | - |  |
| Step6 | Insert description: Berry | $\begin{aligned} & {[B]\left[\tau^{2}\right]} \\ & {[e][r][r][y]} \end{aligned}$ | 5 | $\delta$ |  | BERRY |  |
| Step7 | Select price type. Default is by weight, by count is available by pressing $[\rightarrow \mathrm{T} \leftarrow]$ key | [*] |  |  |  | 83 WELGHT |  |
| Step8 | Please insert unit price | [*] |  |  | 0.00 | LINTT PRILE |  |
| Step9 | Insert unit price: \$1.80/kg | [1][8][0] |  |  | 1.80 | LINT PRILE |  |
| Step10 | Please save PLU. Press $[\rightarrow T \leftarrow]$ key may abort this edition, show "PLU abort" | [*] |  |  |  | PLU SRIVE |  |
| Step 11 | *Print edited PLU information and edit next PLU | [*] |  |  | 89 | PLU MUMEER |  |
| Step 12 | Insert PLU\# 100 | [1][0][0] |  |  | 100 | PLU MUMEER |  |
| Step 13 | Please insert description | [*] | 1 | 1 |  |  |  |
| Step 14 | Insert description: Apple | $[A]\left[T^{2}\right]$ <br> [р][р][1]][e] | 5 | 5 |  | RPPLE |  |
| Step 15 | Select price type | [*] |  |  |  | 8U WEIGHT |  |
| Step16 | Select by count price type | $[\rightarrow T<$ ] |  |  |  | SY COUMT |  |
| Step 17 | Please insert unit price | [*] |  |  | 0.00 | LINT PRILE |  |
| Step18 | Insert unit price: \$0.50/pcs | [5][0] |  |  | 0.50 | LIMT PRILE |  |
| Step19 | Please save PLU | [*] |  |  |  | PLU SRIVE |  |
| Step20 | Print and edit next PLU | [*] |  |  | 101 | PLU MUMEER |  |
| Step21 | Exit item 101, and go to next item 102 | [Mode] | 5102 |  | ------- | PRILE CHANGE |  |

Notice: If you exit before saving PLU, the edited content of this PLU will abort.
The unit price you can input for one PLU is from 0 to 9999.99.

* Printing or not printing edited content depends on setting item 404. "Print edit content", default is to print the edited content.
$\Leftrightarrow$ To insert text:
In text edit mode, there are 4 ways to insert text. Press [ $\tau^{2}$ ] to switch between these options.
"L" on the 1st line means the inserted character will be capital;
" S " means the inserted characters will be lower case;
"," means the inserted characters will be punctuation.
" $C$ " means the character can not be inserted directly; Unicode will be inserted for character. " $m$ " on the bottom line shows one character has been inserted.
In Unicode status, [_] is used to move flashing cursor up and down.
$\Leftrightarrow$ To Insert a Space:
When "L" or "S" or "," is shown, press [_] to add one space behind the character. You may also insert a space by pressing [ ${ }^{\wedge}$ ] when the cursor is to the right of the characters.
Notice: In Unicode status, a space can not be inserted.

| PLU List |  |  |
| :---: | :---: | :---: |
| Scale No.: | 2005-3-12 | 08:30:00 |

| --End-- |  |  |

## Preset PLU into preset key

$\Leftrightarrow$ One Preset Key Stores One PLU

| Procedure | Description | $\begin{array}{\|c\|} \hline \text { Key } \\ \text { operation } \\ \hline \end{array}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on } 1^{\text {st }} \text { line } \\ \hline \end{array}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {dd }} \text { line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on the botiom line } \end{gathered}$ | $\begin{gathered} \hline \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step1 | Weighing mode |  | 0.000 | 0.00 | 0.00 | VI TICKET |  |
| Step2 | Press and hold preset key for about 3 seconds | [A] |  |  | $L$ | ${ }^{\text {ew }} 0$ |  |
| Step3 | *Insert PLU \# | [8][8] |  |  | $L$ | ${ }^{\text {W }} 88$ |  |
| Step4 | Two continuous beeps indicate the PLU has been preset. | [*] | 0.000 | 0.00 | 0.00 | UT TICKET |  |

$\Leftrightarrow$ One Preset Key Stores Two PLUs
If "One preset key stores two Plus" is enabled in setting item 405, and the default is "disabled", one PLU can be preset in one preset key by following the above 4 steps.
To preset two PLUs in the same preset key, please follow the steps below:

| Procedure | Description | $\begin{array}{\|c\|} \hline \text { Key } \\ \text { operation } \\ \hline \end{array}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on } 1^{\text {s }} \text { line } \\ \hline \end{array}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on } 2^{n d} \text { line } \\ \hline \end{array}$ | $\begin{array}{\|c} \hline \text { Display } \\ \text { on } 3 \text { 3d line } \\ \hline \end{array}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on the bottom line } \\ \hline \end{array}$ | $\begin{gathered} \text { Lit } \\ \text { cursor } \\ \hline \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step1 | Weighing mode |  | 0.000 | 0.00 | 0.00 | UI TICKET |  |
| Step2 | Press and hold preset key for about 3 seconds | [A] |  |  |  | ${ }^{20} 0$ |  |
| Step3 | After "PLU 0 " is shown, release the key, then press same key again until see "L 2" | [A] |  |  | 12 | ${ }^{\text {Pu }} 0$ |  |
| Step4 | **Insert PLU \# | [8][8] |  |  | 12 | ${ }^{\text {eu }} 88$ |  |
| Step5 | Two continuous beeps indicate the PLU has been preset. | [*] | 0.000 | 0.00 | 0.00 | UT TICKET |  |

** "L 1" means 1st level PLU, "L 2" means 2nd level PLU
**If PLU number is 0 , then no PLU is in this preset key.

- Recall PLU

Press a preset key to recall PLU stored in level 1. Double click a preset key twice to recall PLU in level 2.
5.4.1.2 Change PLU Price only (102)

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 1^{\text {st }} \text { line } \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \\ \hline \end{array}$ | $\begin{array}{\|c} \hline \text { Display } \\ \text { on } 3^{\text {dd }} \text { line } \end{array}$ | $\begin{array}{c\|} \hline \text { Display } \\ \text { on the bottom line } \\ \hline \end{array}$ | $\begin{array}{\|l\|l\|} \hline \text { Lit } \\ \text { cursor } \end{array}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| --- | In setup mode, "GR XX" is shown. e.g. "Gr 01" |  | GR 07 |  | ------- | IMFO IMPUT |  |
| Step 1 | Confirm PLU \#, please change price. | [1][0][2] | 5102 |  | ------- | PRILE CHINIGE |  |
| Step2 | Edit PLU's price | [*] | 5102 | 3.00 | PlU 1 | BERRS |  |
| Step3 | Insert PLU \#, show its current price and description | [8][8] | 5102 | 1.80 | PLU 88 | BERRS |  |
| Step4 | Insert new price | [*][5][0][0] | 5102 | 5.00 | PLU 88 | UINTT PRILE |  |
| Step5 | Print the change and proceed to next existing PLU | [*] | 5102 | 9.00 | PLU 89 | BEEF |  |
| Step6 | Insert PLU \#, show its current price and description | [3] | 5102 | 8.00 | PLU3 | STERK |  |
| Step7 | Insert new price | [*][6][5][0] | 5102 | 6.50 | 3 | UNHT PRICE |  |
| Step8 | Continue until finished | ------ |  |  |  | GETTIMG PLU |  |
| Step9 | Press [mode] to exit and go to next setting item. | [Mode] | 5103 |  | ------- | PLU COMTEMT |  |

The price change list is as follows:

| PLU Price Change List |  |  |  |
| :---: | :--- | :---: | :---: |
| Scale No:1 | 2005-3-12 | 08:30:00 |  |
| PLU | Description | Original | New |
| No. |  |  |  |
| 1 | Steak | 5.23 | 5.00 |
| 2 | Apple | 9.00 | 8.00 |
| --End-- |  |  |  |

### 5.4.1.3 Define the Content of PLU (103)

11 items of a PLU can be defined as visible (can be seen) or invisible (can not be seen) when editing a PLU in setting item 101.

| ld \# | Items in a PLU |  | Parameter |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Displayed on the bottom line | Description | Default displayed on the bottom line | Description |
| 1 | ITEM MO. | Item no. | DFF | invisible |
| 2 | DESCRIPT | Description | OM | Visible |
| 3 | GROUP | Group no. | OFF | invisible |
| 4 | PRICE | Unit price | OM | Visible |
| 5 | Qupatity | Quantity | OM | visible |
| 6 | FIX UT | Fix weight | DFF | invisible |
| 7 | TRRE NO. | Tare no. | OFF | invisible |
| 8 | 5ELL B4 | Sell by | OFF | invisible |
| 9 | BEST BEF | Best before | OFF | invisible |
| 10 | LRBEL Mo. | Label format no. | DFF | invisible |
| 11 | EXT TEXT | Extra text | OFF | invisible |

Notice: the sell offset and best before days can be set from 0 to 999;
The fix weight can be set from 0 to 999999.
E.g.: Let group \# be visible when editing PLU information.

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 1^{\text {st }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {rd }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{gathered} \mathrm{Lit} \\ \text { cursor } \\ \hline \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step 1 |  | -- | GR 1 |  | ------- | IMFO IMPUT |  |
| Step2 | Off: Invisible | [1][0][3][*] | 5103 |  | 101 | ITET M 1 O. OFF |  |
| Step3 |  | [*][*] | 5103 |  | 121 | GROUP OFF |  |
| Step4 | Change to On: Visible | $[\rightarrow T<]$ | 5103 |  | 103 | GROLP OM |  |
| Step5 | Confirm | [*] | 5103 |  | 114 | PRILE OIM |  |
| Step6 | Change other items if needed | ---- | ---- |  | ---- | ---- |  |
| Next | Exit and print, then go to next setting item | [*] | 5103 |  | --- |  |  |
| Next |  |  | 5104 |  |  | GROUP EDIT |  |

PLU content list lists all visible items. For example:

| PLU content List |  |  |
| :---: | :---: | :---: |
| Scale No.: 1 2005-3-12 08:30:00 |  |  |
| 2 | Description |  |
| 3 | Group No. |  |
| 4 | unit price |  |
| 5 | Count |  |
| --End-- |  |  |

### 5.4.1.4 Edit Group Information (104)

There are 20 groups. To edit group information, please see below:
VAT
VAT can be edited when editing group is enabled. VAT can be enabled or disabled through the setting in setting item 410. Edit group
e.g.:

| Group \# | Description | Tax |
| :--- | :--- | :--- |
| 8 | FOOD | $6.00 \%$ |

| Procedure | Description | Key operation | $\begin{array}{\|l} \hline \text { Display on } \\ 1^{\text {st }} \text { line } \end{array}$ | $\begin{array}{\|l} \hline \begin{array}{c} \text { Display on } 2^{\text {nd }} \\ \text { line } \end{array} \end{array}$ | Display on $3^{\text {rd }}$ line | $\begin{array}{\|l} \hline \begin{array}{c} \text { Display on the } \\ \text { bottom line } \end{array} \end{array}$ | $\begin{array}{\|c\|} \hline \text { Lit } \\ \text { Cursor } \\ \hline \end{array}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step 1 | In setup mode, " $G R X X$ " is shown. e.g " Gr 01 " | ------ | $60^{6} 07$ |  | -- | IMFO IMPUT |  |
| Step2 | VAT is disenabled | [4][1][0] [*] | 5470 |  | 1 | HO VIT |  |

RS Series Service Manual

| Step3 | VAT is enabled | [ $\rightarrow \mathrm{T}<1]$ | 5470 |  | 0 | VRT PERIIIT |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step4 | Confirm and go to next item | [*] | 547 |  | ------- | $\begin{aligned} & \text { TRRE/P } \\ & \text { CLERR } \end{aligned}$ |  |
| Step5 | Get to setting 104. Default is group 1 | $\begin{aligned} & {[\text { Mode }][1][0][4]} \\ & {\left[{ }^{*}\right]} \end{aligned}$ | 5104 |  | GRP 1 | GROUP MIT. |  |
| Step6 | Insert group no. 8 | [8] | 5104 |  | GRP 8 | GROUP MU. |  |
| Step7 | Please insert description of group 8 | [*] | L | 1 |  |  |  |
| Step8 | Insert description "FOOD" | [F][0][0][D] | L | 5 |  | F000 |  |
| Step9 | Please insert VAT rate | [*] |  |  | 0.00 | ITPUTV VIT \% |  |
| Step 10 | Insert tax rate 6.00\% | [6][0][0] |  |  | 6.00 | HTPUTVIRT \% |  |
| Stepl1 | Print and begin next group edit | [*] |  |  | GRP 9 | GROUP ME. |  |
| Step12 |  | ------- |  |  |  |  |  |
| Step 13 | Exit and go to next item | [Mode] | 5105 |  | ------ | VENAOR EDIT |  |

Print edited group information

| Group List |  |  |
| :---: | :--- | :---: |
| Scale No.: 1 | $2005-3-12$ | 08:30:00 |
| Group No. | Description | VAT |
| 1 | FOOD | $6.00 \%$ |
| --End-- |  |  |

### 5.4.1.5 Edit Vendor Information (105)

There are 4 vendors. The procedure to edit is as follows. E.g.: Vendor 1, name is SUSAN.

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } \mathrm{s}^{\text {s }} \text { line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{d d} \text { line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{gathered} \hline \text { Lit } \\ \text { cursor } \\ \hline \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step5 | In setup mode, " $G R$ XX" is shown. e.g. " Gr $01 "$ | ------ | 6907 |  | ------- | IMFO IMSERT |  |
| Step6 | Get to setting 105. Default is Vendor 1 | [1][0][5] [*] | 5105 |  | 1 | VEFIDOR PMO. |  |
| Step7 | Please insert name | [*] | 5105 | $L$ | 1 |  |  |
| Step8 | Insert name (at most 19 characters) | [S][U][S][A][N] | 5105 | $L$ | 5 | SuShiy |  |
| Step9 | Print and begin to edit next one | [*] |  |  | 2 | VEYYDOR MVI. |  |
| Step10 |  | ------ |  |  |  |  |  |
| Step11 | Exit and go to next item | [MODE] | 106 |  | ----- | DRTR/TIME |  |

Printed edited vendor information

| Vendor List |  |
| :---: | :--- |
| Scale No.: | 2005-3-12 | 08:30:00

### 5.4.1.6 Edit Data and Time (106)

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{array}{\|c} \text { Display } \\ \text { on 1s line } \end{array}$ | $\begin{aligned} & \text { Display } \\ & \text { on } 2^{\text {nd }} \text { line } \end{aligned}$ | Display on $3^{\text {dr }}$ line | Display on the bottom line | $\begin{aligned} & \text { Lit } \\ & \text { cursor } \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step1 | In setup mode, " $G R$ XX" is shown. E.g. "Gr 01" | ----- | 6907 |  | ------- | IMEO IMPUT |  |
| Step2 | Get to setting 106. And show date type | [1][0][6] [*] | 5106 |  | 04-08-18 | リリ-mT-00 |  |
| Step3 | There are 3 kinds. YY : year, MM: month, DD: day. Select MM-DD-YY | $[\rightarrow T \leftarrow]$ |  |  | 08-18-04 | min-00-sy |  |
| Step4 | Change date to 03-23-05 | [*][0][3][2][3][0][5] |  |  | 03-23-05 | mm-00-4y |  |
| Step5 | Change time | [*] | 5106 | 08:18:00 |  | H\%-9\%-55 |  |
| Step6 | Exit and go to next item | [*] | 5107 |  | ------- | SHOP EDIT |  |

## Very Important Notice

In step 5 or step 6, if the new input date or time is earlier than the current, once it is confirmed, all transaction data will be deleted. So please be careful about it. Meanwhile more steps are added below to avoid misoperation.
E.g.: The input date is earlier than current date. Same thing is to time.

|  | Please confirm. Default is not to change "NO" | $[*]$ |  |  | $04-04-18$ | CHRNGE NO |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| next | Go back to last step to input new date | $[*]$ |  |  | $04-05-18$ |  |  |

If select to change, the operation is as follows:

|  | Please confirm. Select to change "YES" | $[\rightarrow \mathrm{T} \leftarrow]$ |  |  | $04-04-18$ | CHRNIGE SES |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| next | Confirm and do to next step | $[*]$ |  | $08: 18: 00$ |  | $4 H-7 \pi T-55$ |  |

5.4.1.7 Edit Store Name (107)
E.g.: Store address is:

OHAUS
PINE BROOK NJ

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 5^{\text {st }} \text { line } \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \\ \hline \end{array}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {rd line }} \\ \hline \end{gathered}$ | $\begin{gathered} \hline \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{gathered} \mathrm{Lit} \\ \text { cursor } \\ \hline \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step 1 | In setup mode, "GR XX" is shown. e.g. " Gr 01 " | ----- | $66^{6} 07$ |  | ------ | INFO INPUT |  |
| Step2 | Get to setting 107. | [1][0][7] | 5107 |  | ------ | SHOP EDIT |  |
| Step3 | Please insert the 1st line | [*] | L | 11 |  |  |  |
| Step4 | Insert 1st line | [0][H][A][U][S] | L | 7* 15** |  | 0HAUS |  |
| Step5 | Press [ $\downarrow$ ] to edit 2nd line | $\begin{aligned} & {[\downarrow][P][1][\mathrm{N}][\mathrm{E}][\mathrm{L}][\mathrm{B}][\mathrm{R}]} \\ & {[\mathrm{O}][0][\mathrm{K}][\mathrm{L}][\mathrm{N}][\mathrm{J}]} \end{aligned}$ | $L$ | $2 \quad 5$ |  | PIME BROOK ML |  |
| Step6 | Finish edit and go to next item | [*] | 5108 |  | ---- | SCRLE NO. |  |

* It is the line number of the text.
** It is the character number of one line.
Notice: you can input 32 characters each line and you can input 69 characters in total.
The printed address

## Store Address <br> OHAUS <br> PINE BROOK NJ

5.4.1.8 Edit Scale Number (108)

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | Display $\text { on } 1^{\text {st }} \text { line }$ | $\begin{array}{\|c} \hline \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \\ \hline \end{array}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {rd }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { Lit } \\ \text { cursor } \\ \hline \end{array}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step1 | In setup mode, " $G R$ XX" is shown. e.g. " Gr 01 " | ------ | GR 07 |  | ------ | IMFO INPUT |  |
| Step2 | Get to setting 108. | [1][0][8][*] | 5108 |  | ------- | SCRLE MIO. |  |

| \#3: |  |
|  | BEEF |
|  | TEMP: $-5^{\circ} \mathrm{C}$ |

### 5.4.1.11 Edit Tare Information (111)

There are 20 tare values

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 1^{s t} \text { line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {rd }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{gathered} \hline \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step 1 | In setup mode, " $G R$ XX" is shown. e.g. " Gr 01 " | ------ | GR 01 |  | ------- | IMFO IIMPUT |  |
| Step2 | Get to setting 111 | [1][1][1] | 5 mm |  | ------- | TRRE EDIT |  |
| Step3 | Default to edit tare 1 | [*] | 5 m |  | TRRE 1 | TRRE MID. |  |
| Step4 | Edit tare 3 | [3][*] | 5 mm |  | TRRE 3 | TRIRE M T L. |  |
| Step5 | Please insert tare value |  | 5 m | 0.000 | TRRE 3 | TRSE 0.000 |  |
| Step6 | Insert tare 0.200kg | [2][0][0] | 5 mm | 0.000 | TRRE 3 | TRSE 0.200 |  |
| Step7 | Edit tare 5 | [*][5][*] | 5 mm | 0.000 | TRRE 5 | TRSE 0.000 |  |
| Step8 | The weigh is 0.560 kg | Put the container on the platter | 5 m | 0.560 | TRRE 5 | TRRE 0.000 |  |
| Step9 | Take the weight as tare value | [ $\downarrow$ ] | 5 mm | 0.560 | TRRE 5 | TRRE 0.560 |  |
| Step10 | Edit next | [*] | 5 mm |  | TRRE 6 | TRSE NOL. |  |
| Stepl1 | Exit and go to next item | [MODE] | 5172 |  | ---- | BRR COOE |  |

Notice: tare can be set from 0 to 999.999 g.
The edited tare information will be printed as follows:

| Tare List |  |
| :---: | :---: |
| Scale No.: | 2005-3-12 |
| 08:30:00 |  |
| 3 | tare |
| 5 | 0.200 kg |

|  |
| :--- | :--- |
| --End-- |
| 0.560 kg |

5.4.1.12 Edit Bar Code Format (112)

There are 7 bar code formats, including EAN13, EAN8 and code 39, code 25, ean 128, upc8, 13+5 code. The following lists all available parameters in the format structure.

| Param eter | Instruction | Remark | Available format |
| :---: | :---: | :---: | :---: |
| 0~9 | Digits | Up to 12 digits |  |
| A | Item \# | 4,5 or 6 up to 12 digits |  |
| B | Amount | 4,5,6 or 7 digits | The digits behind decimal point may be 0,1,2 or 3 |
| C | Check sum | 1 digit |  |
| N | Ticket \# | 4 digits |  |
| P | PLU\# | 4 digits |  |
| Q | Weight/Quantity | 4 or 5 digits | Weight: The digits behind decimal point may be 2 or 3 Quantity: 0, 1, 2,3,4 |
| W | Group \# | 2 digits |  |

If the actual digits are less than the defined quantity, 0 will be added in front of the data.
For example:

| Bar code type |  |
| :--- | :--- |
| sAN 13 | 21 AAAABBBBBC=21+5-digit item |

Notice: If the first 2 characters of the format are fixed number, e.g. 21 AAAAABBBBBC, those two digits are regarded as identification code (ID code), which can not be repeated. If it is repeated, "rept bar" will be shown to indicate the ID code has been used, please use another one.

The procedure to edit is as follows:

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } \mathrm{s}^{\text {st }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {d }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{gathered} \mathrm{Lit} \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step 1 | In setup mode, " $G R X X$ " is shown. e.g. " Gr $01 "$ | ------ | GR 07 |  | ------- | IMFO INPUTT |  |
| Step2 | Get to setting 112 by inserting item \# | [1][1][2] [*] | 5712 |  |  | BAR COOE |  |
| Step3 | Default to edit bar code 1 (1~12) | [*] | 5712 | Bin 1 |  |  |  |
| Step4 | Default is EAN13, press $[\rightarrow \mathrm{T} \leftarrow]$ to select other format | [*] | 5 mP | Big 1 | ERI 13 |  |  |
| Step5 | Insert content | [2][1][A][A]--- | 5712 | BR 17 | ERI 13 | 219R19R9888880 |  |
| Step6 | Right shift of A: 2 bites | [*][ ${ }^{\text {c }}$ ] [ $\bullet$ ] | 5712 | BHR 1 | 2* | 8 Shilf |  |
| Step7 | Left shift of B: 1 bite | [*][4] | 5172 | Big 1 | -7* | 8 Shift |  |
| Step8 | Check sum type: 1 (1: normal , 2: reverse) | [*] | 5172 | Bin 1 | 1 | [- PRRITY* |  |
| Step9 | Print and edit next one | [*] | 5172 | 898 | Ran 13 |  |  |
| Step10 | Edit other bar code if needed | ----- | 5172 | ----- | ----- | ----- |  |
| Stepl1 | Exit and got to next item | [MODE] | 5113 |  |  |  |  |

When one bar code contains parameter $Q$, in the step to select shift, you will see $Q / W$ and $Q / Q . ~ Q / W$ is for by weight PLU, and $Q / Q$ is for by count PLU.
If a format contains 2 digits ( $0 \sim 9$ ) at the beginning, we call these 2 digits as ID code. This ID code can not be used again in other formats. If this ID code is used by other barcode format or discount card, "REPT BAR $X X{ }^{\prime}$ " (it means this ID code has been used by bar code format XX ) or "REPT CRRD G" (it means this ID code has been used by gold card) or "REPT CRRD S" (This means this ID code has been used by silver card) will be shown.

* Positive data means right shift, negative data means left shift, and the default is 0 . Each parameter of bar code is related to the others, so the content will not be saved until you go to the last step.
** When decode, if one bar code format contains A or P, follow the rule in the format edit to shift the bites according to PLU's price type by weight or by count.
There are 12 bar code formats ( $1 \sim 12$ ). The default format for ticket is 1 , for label it is 2.

The printed bar code format.

| Bar Code Format List |  |  |  |
| :---: | :---: | :---: | :---: |
| Scale | 1 | 2005-03-12- | $08: 30: 00$ |
| $\#$ | Type | Format |  |
| 1 | EAN13 | 21AAAAAABBBBC |  |
| 2 | EAN13 | 23AAAABBBBBBC |  |
| --End-- |  |  |  |

5.4.1.13 The Relationship between Label/Ticket Format and Bar Code Format (113)

The procedure to edit bar code format is as follows:

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { On } 1^{\text {st }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {rd line }} \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{gathered} \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step 1 | In setup mode, "GR XX" is shown. e.g. "Gr 01" | ------ | 6907 |  | ------- | IMFO IIYSERT |  |
| Step2 | Access to item 113 | [1][1][3] | 5173 |  | ------ | BAR [ $1 / 5 \mathrm{~T} / \mathrm{L}$ |  |
| Step3 | Select ticket | [*] | 5113 |  | TICKET |  |  |
| Step4 | Select label | $[\rightarrow T<]$ | 5113 |  | LSBEL |  |  |
| Step5 | Insert the ticket format \# | [*] | 5173 |  | LREEL 1 |  |  |
| Step6 | Insert the bar code format \# | [*][3] | 5173 |  | LREEL 1 | BRP CODE 3 |  |
| Step7 | Save and edit next | [*] | 5173 |  | LSBEL 2 |  |  |
| Step8 | Exit the last level | [Mode] | 5113 |  | 19851 |  |  |
| Step9 | Exit and go to next item | [Mode] | 5714 |  | ------- | INVEMTORS |  |

There are 10 fixed label formats (101~110) and 10 free label formats ( $1 \sim 10$ )
The Printed corresponding relationship

5.4.1.14 Update Stock (114)
E.g.: One store stocks the following goods in the morning, and wants to insert the data into scale, and clear all stock before doing so:

| PLU \# | Description | Weight (kg)/Quantity (PCS) |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | Cooked bean curd bun | 200 |  |  |  |  |  |  |
| 3 | Beef | 10kg |  |  |  |  |  |  |
| 4 | Stick | 50 kg |  |  |  |  |  |  |
| Procedure | Descripition |  | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | Display on $1^{\text {st }}$ line | $\begin{gathered} \hline \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {d l line }} \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on the bottom line } \end{array}$ | $\begin{aligned} & \hline \text { Lit } \\ & \text { cursor } \end{aligned}$ |
| Step 1 | In setup mode, " $G R X X$ " is shown. e.g. " $G r$ 01" |  | ------ | 6 G 07 |  | ------- | MFED IMPUT |  |
| Step2 | Access to item 114 |  | [1][1][4] | 5174 |  | .-..-- | INUEMTORY |  |
| Step3 | Default is No , which means to add stock |  | [*] |  |  |  | CLEAR NO |  |
| Step4 | Select yes to clear all stock |  | $[\rightarrow \mathrm{T}<]$ |  |  |  | CLERR RLL |  |
| Step5 | Insert PLU \#, default is 1 |  | [*] |  | 0 | PLU 1 | *+ 0 |  |

| Step6 | Insert the quantity of PLI 1:200 | [*][2][0][0] |  | 0 | PLU 1 | + 200 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step7 | Edit the next PLU. | [*] | 0.000 | 0.000 | PLU? | + 0.000 |
| Step8 | Insert the PLU \#: 3 | [3][*] | 0.000 | 0.000 | PLU3 | $+0.000$ |
| Step9 | The weight will show in the weight window | Put on the items | 10.000 | 0.000 | PLU3 | + 0.000 |
| Step10 | Take the weight as stock insert | [ $\downarrow$ ] | 10.000 | 0.000 | PLU3 | + 10.000 |
| Stepl1 | Remove the items and edit next PLU | [*] |  | 0.000 | PLUY | + 0.000 |
| Step 12 | Insert the weight via keyboard directly | [*][5][0][0][0][0] | 0.000 | 0.000 | PLUY | + 50.000 |
| Step13 | Edit next PLU | [*] |  | 0.000 | PLU 5 | + 0.000 |
| Step14 | Exit and go to next item | [MODE] | 175 |  |  | --- |

Notice: the purchase quantity is : 0~999.999(by weight), 0~999999(by count).
The printed stock list

| Purchase List |  |  |
| :---: | :---: | :---: |
| Inventory | Add | Total |
| PLUI COOKED BEANCURD BUN |  |  |
| 0 | 200 | 200 |

### 5.4.1.15 Settle the Inventory (115)

E.g.: When business is over, employees begin to settle the inventory, and use the actual data as stock.

| PLU \# | Description | Actual Weight (kg)/Quantity (PCS) |
| :--- | :--- | :--- |
| 1 | Cooked bean curd bun | 20 |
| 3 | Beef | 2 kg |
| 4 | Stick | 3 kg |

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 1^{\text {st }} \text { line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {rd }} \text { line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \\ \hline \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { Lit } \\ \text { cursor } \\ \hline \end{array}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step 1 | In setup mode, "GR XX" is shown. e.g. "Gr 01" | ----- | 6 G 07 |  | ------- | IMFO INPUT |  |
| Step2 | Begin to settle, and "update $\mathrm{NO}^{\prime \prime}$ means not to use the actual inventory as the stock. | $\begin{aligned} & {[1][1][5]} \\ & {[*]} \end{aligned}$ | 5715 |  |  | UPDRTE NID |  |
| Step3 | Select yes, which means to use actual data as stock | $[\rightarrow T<]$ | 5715 |  |  | UPDRTE YES |  |
| Step4 | Settle first PLU: PLU 1 | [*] |  | 20* | PLU 1 | 0 |  |
| Step5 | Insert the actual quantity: 20 | [*] [2][0] |  | 20 | PLU 1 | 20 |  |
| Step6 | Default is to edit next PLU, insert PLU \# 3 | [*][3] |  | 0.950 | PLU 3 | 0.000 |  |
| Step7 | Please insert the weight of PLU 3 | [*] | 0.000 | 0.950 | PLU 2 | 0.000 |  |
| Step8 | Put the items on the platter .The weight display window will show the weight |  | 0.050 | 0.950 | PLU 2 | 0.000 |  |
| Step9 | Take the weight as insert | [ $]$ | 0.050 | 0.950 | PLU 2 | 0.050 |  |
| Step10 | Edit next PLU | [*] |  | 0.950 | PLU 3 | 0.000 |  |
| Step 11 | Exit and go to next item | [Mode] | 5715 |  | ------ | Discolint |  |

* This data is the calculated inventory based on the stock and sales.

Notice: the update quantity is: 0~999999(by count) and 0~999.999(by weight).
The printed inventory check list

| Inventory Check List |  |  |

### 5.4.1.16 Edit Discount Information (116)

There are two types of discount, percentage and new price. To total price, all items or group, only percentage discount is available. For one item, you may select percentage discount or new price.
For example: Date: from 04-05-18 to 05-05-18 Time 9:30:00~19:30:00 (If date or time is 0 , it means no limit) The priority of discount (from highest to lowest) is PLU, then group, and then all items

|  | Total price | All Item | Group | Grape | Apple |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  |  | All items | Group 4 | Plu 1 | Plu 14 |
| Discount |  | $-12 \%$ | $-15 \%$ | $-20 \%$ | New price: 15.00 |
| *Condition |  | N/A | N/A | $>=2.000 \mathrm{~kg}$ | $>=2$ pcs |

*O means no condition; N/A means this step is not available.

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { On 1st line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {rd }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{gathered} \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

### 5.4.1.18 Edit Discount Card (118)

Edit card is valid only to total amount. E.g.: The card with AC as first 2 digits is Gold card.
Be care that the used ID code here can not be used in bar code format as ID code. If ID has been used by barcode format as an ID code, "REPT BRR $X X$ " will be displayed to indicate that it has been used by bar code format XX.

|  | Gold card |
| :--- | :---: |
| Discount rate | $-12 \%$ |
| ID code | AC |

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 1^{\text {st }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {rd }} \text { line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on the boftom line } \end{gathered}$ | $\begin{gathered} \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step 1 | In setup mode, "GR XX" is shown. e.g. "Gr 01" |  | 6 G 07 |  | ------- | IMFO IMPUT |  |
| Step2 | Edit discount card | [1][1][8] | 5718 |  | ------- | DISC CARD |  |
| Step3 | Edit silver card | [*] | 5178 |  |  | SILVER CRRD |  |
| Step4 | Edit golden card | $[\rightarrow T<]$ | 5118 |  |  | GOLD CARD |  |
| Step5 | Insert the discount rate: -12\% | [*][1][2] | 5718 | 6020 | $-12 \%$ | PERCEMT \% |  |
| Step6 | Insert the identification content: AC | [*][A][C] | 5118 | 6000 |  | Tic |  |
| Step7 | Edit golden card | [*] | 5178 |  |  | GOLD CRRD |  |
| Step8 | Exit and go to next item | [MODE] | 5179 |  |  | RRFFLE |  |

5.4.1.19 Edit Raffle (119)

For example: Date: from 04-05-18 to 05-05-18 Time 9:30:00~19:30:00 (If any date or time is 0 , it means no limit) Condition: One raffle every 20 tickets with total amount not less than $\$ 50$, Gifts (up to 3 gifts) are as follows: one bag of washing powder (PLU 30).

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on } 1^{\text {st }} \text { line } \\ \hline \end{array}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \\ \hline \end{array}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on } 3^{\text {rd }} \text { line } \\ \hline \end{array}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on the bottom line } \\ \hline \end{array}$ | $\begin{gathered} \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step1 | Access to raffle edit, insert the date and time with the same way as in edit discount |  |  |  |  |  |  |
| Step2 | Insert the amount condition | [*] | 5179 |  | 0.00 | TOTRL $\$>=0.00$ |  |
| Step3 | Insert the total amount condition: >=\$50.00 | [5][0][0][0] | 5719 |  | 50.00 | TOTRL \$ $\$>=0.00$ |  |
| Step4 | Insert the ticket quantity: 20 | [*][2][0] | 5179 |  | 20 | TICKET QTY |  |
| Step5 | Edit gift 1, insert the PLU \# of gift: 30 | [*][3][0] | 5179 |  | PLU 30 | GIFT 1 PLU |  |
| Step6 | Insert the quantity of gift 1: 1 | [*][1] | 5719 |  |  | GIFT 1 (QTS) |  |
| Step7 | Insert the unit of gift 1: bag | [*][B][A][G] | L | 4 |  | B96 |  |
| Step8 | Edit gift 2 | [*] |  |  | PLU 0 | GIFT 2 PLU\# |  |
| Step9 | Exit and go to next item | [Mode] | 5120 |  | --- | PROMOTIOM |  |

5.4.1.20 Print Promotion Information (120)

To print all edited promotion information and all related setting:

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } \mathrm{y}^{\text {st }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {d }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on the boftom line } \end{gathered}$ | $\begin{gathered} \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Step39 |  | --- |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step40 | Access to setting 121 | [1][2][0] | 120 | ------ | PRIM PROMOTE |  |
| Step41 | Print information | [*] |  |  | PRIIIT YES |  |
| Step42 | Don't print | $[\rightarrow T<]$ |  |  | PRIITT NO |  |
| Step43 | Exit and go to next item | [*] | 121 | ------ | PRODULT DRTE |  |

### 5.4.1.21 Change Production Date (121)

In this setting item, production date can be changed. It only effects the date printed on the labels.

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 1^{s} \text { line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {d }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{gathered} \text { Lit } \\ \text { cursor } \\ \hline \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step1 | In setup mode, " GR XX " is shown. e.g. " Gr $01 "$ | ---- | 6907 |  | ------- | IMFO INPUT |  |
| Step2 | Access to production date edit | [1][2][1] | 5121 |  | ------- | PROOULT DRTE |  |
| Step3 | Show current date | [*] | 5121 |  | 05-08-12 | CURREMT +0 |  |
| Step4 | The production date is 2 days later than | - ] [ ${ }^{\text {c }}$ |  |  | 05-08-74 | *CURREMT + +2 |  |

|  | current date |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Step5 | Exit and go to next item | $\left[^{*}\right]$ | 5122 |  | $\ldots-\cdots$ | PRINT PLU |  |

* Positive date means the date is later than the current date. . Negative date means the date is earlier than the current date.
5.4.1.22 Print Edited PLU (122)

Print the edited PLUs as needed

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 1^{\text {s }} \text { line } \\ \hline \end{gathered}$ | $\begin{array}{\|c} \hline \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \\ \hline \end{array}$ | $\begin{gathered} \text { Display } \\ 0^{2 n} 3^{d r} \text { line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Lit } \\ \text { cursor } \\ \hline \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Step 14 | Exit and go to next item | [*] | 5304 |  | ------ | OEL RLL REPT |  |

Notice: Only weekly, monthly and yearly reports will not be deleted.
5.4.3.4 Delete All Report (304)

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 1^{\text {st }} \text { line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd line }} \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {rd line }} \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{gathered} \text { Lit } \\ \text { cursor } \\ \hline \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step15 | In setup mode, "GR XX" is shown. e.g. "Gr 01" | ----- | GR |  | ------- | IMFO IMPUT |  |
| Step16 | Access to setting 304, delete all reports | [3][0][4] | 5304 |  | ------- | OEL RLL REPT |  |
| Step17 | Default is not to delete | [*] | 5304 |  |  | SUIRE NO |  |
| Step18 | Select to delete | $[\rightarrow T \leftarrow]$ | 5304 |  |  | SURE YES |  |
| Step19 | Exit and go to next item | [*] | 5305 |  | ---- | RESET SCRIL |  |

### 5.4.3.5 Reset Scale (305)

Notice: Please pay attention to this item because resetting scale will clear all edited information. Additionally, all parameters of setting items, with the exception of those in group 5 and setting item 702(Ethernet settings), will be restored into default.

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 1^{s} \text { line } \\ \hline \end{gathered}$ | $\begin{aligned} & \text { Display } \\ & \text { on } 2^{\text {nd }} \text { line } \\ & \hline \end{aligned}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {d d }} \text { line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{array}{\|l\|l\|} \hline \text { Lit } \\ \text { cursor } \\ \hline \end{array}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step 1 | In setup mode, "GR XX" is shown. e.g. "Gr 01" | ---- | GR 07 |  | --.---- | IITFO IITPUT |  |

RS Series Service Manual

| Step2 | Access to setting 305, reset scale | [3][0][5] | 5305 | --- | Reset Scile |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step3 | Default is not to reset scale | [*] | 5305 |  | SUIEE NO |  |
| Step4 | Select reset | $[\rightarrow T<]$ | 5305 |  | SURE YES |  |
| Step5 | In the process of resetting | [*] | 5305 |  | COMFIG RETIU |  |
| Step6 | Reset finish |  | 5305 |  | -----0\%----- |  |
| Step7 | Exit and go to next item | [MODE] | 5307 | ------- |  |  |

5.4.3.6 Liecence (306)

In order to get a license of some options like battery or/and Ethernet. You may use this to get a 20 -character PID. Please send PID and your requirement on option to MT, MT can create and send you a LID. After input the LID, the relevant options will be enabled.
E.g.: One customer wants options battery and Ethernet enabled, he can use the following steps to find PID.

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 1^{\text {st }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {d }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{gathered} \mathrm{Lit} \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step1 | In setup mode, "GR XX" is shown. e.g. "Gr 01" | ----- | GR O1 |  | ------- | IMFO IMPUT |  |
| Step2 | Access to setting 306 to get PID or input LID | [3][0][6] | 5306 |  | ------ | PID LiD |  |
| Step3 | Show main board \# | [*] | 5306 |  | 123456 | MRily bongo |  |
| Step4 | Show license \#, 1 means no option is enabled | [*] | 5306 |  |  | LICEMSE |  |
| Step5 | *Show PID. Send this 20-charcater PID to MT | [*] | 5306 |  | PID | R6789908LHEF |  |
| Step6 | Please input LID | [*] | 5306 |  | 110 |  |  |
| Step7 | Print PID and return to weighing mode | [*] | 0.000 | 0.00 | 0.00 | VI TICNET |  |

* Use key [ ${ }^{4}$ ] or [ ' ] to see the invisible characters

The customer sends the PID to MT and tells MT he wants Ethernet and battery functions enabled. MT will create and send him a 20 -character LID. He follows the following steps to input the LID. After the LID is input, those 2 functions will be enabled, and the license number will become to 7 automatically.

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \\ \hline \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on } 1^{\text {s }} \text { line } \\ \hline \end{array}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {rd line }} \end{gathered}$ | $\begin{array}{c\|} \text { Display } \\ \text { on the botiom line } \end{array}$ | $\begin{gathered} \text { Lit } \\ \text { cursor } \\ \hline \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step 1 | In setup mode, "GR XX" is shown. e.g. "Gr 01" | ------ | 6 G 07 |  | ------- | IMFO INPUT |  |
| Step2 | Access to setting 306 to get PID or input LID | [3][0][6] | 5306 |  | ----- | PID LiD |  |
| Step3 | Show PID | [*][*][*] | 5306 |  | PID | 9678990 |  |
| Step4 | Please input LID | [*] | 5306 |  | 110 |  |  |
| Step5 | Input LID | [1][2][A]----- | 5306 |  | Lil | 129-------- |  |
| Step6 | *Confirm input | [*] | 5306 |  |  | ---0K--- |  |
| Step7 | Go to S301 |  | 5307 |  | ------ | DELETE PLU |  |

* If LID is not right, "Input Error" will show on the display.

| Step2 | Abort selection | [*] | 5435 |  | 0 | SUIRE MO |  |
| Step3 | Select to confirm it | $[\rightarrow T \leqslant]$ | 5435 |  | 0 | SURE YES |  |
| Step4 | Setting process | [*] |  |  |  | ---DK-- |  |
| Step5 | Setting finished and go to next item |  | 5436 |  | --- | LIIER RELUIITI |  |

Once the way to delete reports is set as automatic, the scale will delete reports at 00:00:00 every day, and 00:00:00 will be the beginning time of the reports. Scale will keep 2 business days' of reports and a total report. You may select the date when editing reports' setting items. E.g.: editing sales report setting item 602.

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } \mathrm{s}^{\text {st line }} \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \\ \hline \end{array}$ | Display on $3^{\text {rd }}$ line | $\begin{array}{c\|} \hline \text { Display } \\ \text { on the bottom line } \end{array}$ | $\begin{gathered} \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step 1 | In setting mode, " $G R X X$ " is shown. e.g. " $G r$ $01 "$ | ------ | GR 07 |  | ------ | INFO IMPUT |  |
| Step2 | Access to sales report setting item 602. Default is today, press $[\rightarrow T \leftarrow]$ may select last business day (yesterday) or total reports of all reports | [6][0][2][*] | 5602 |  | 05-06-18 | T008Y |  |
| Step3 | Select total reports | $[\rightarrow T \leftarrow][\rightarrow T \leftarrow]$ | 5602 |  | *05-06-16 | TOTRL |  |
| Step4 | Default is detail report. press $[\rightarrow \mathrm{T}<$ ] may select simple report (Simple rpt) | [*] | 5602 |  |  | OETRIL RPT |  |
| Step5 | Don't print | [*] | 5602 |  |  | MGIT PRIINT |  |
| Step6 | Select printing | $[\rightarrow T \leftarrow]$ | 5602 |  |  | PRINT |  |
| Step7 | Print report and go to next item | [*] | 5603 |  | ------ | PLU REPORT |  |

Notice: Total reports can be deleted in setting item 303.

## To To delete reports manually

Set the way to delete reports manually in setting item 435.

| Procedure | Description | Key operation | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on } 1^{\text {st }} \text { line } \\ \hline \end{array}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \\ \hline \end{array}$ | $\begin{gathered} \text { Display } \\ \text { On } 3^{\text {rd }} \text { line } \end{gathered}$ | Display on the bottom line | $\begin{aligned} & \text { Lit } \\ & \text { cursor } \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| ------ | In setting mode, " $G R X X "$ is shown. e.g. " Gr $01 "$ $01 "$ |  | 6, 07 |  | ------- | IINEO INTPUT |  |
| Step 1 | Delete reports automatically | [4][3][5][*] | 5435 |  | 0 | RPT OEL BULTO |  |
| Step2 | Select to delete reports manually | $[\rightarrow T \leftarrow]$ | 5435 |  |  | RPT DEL HRIVI |  |
| Step3 | Abort selection | [*] | 5435 |  | 0 | SUIRE NIG |  |
| Step4 | Select to confirm it | $[\rightarrow T \leftarrow]$ | 5435 |  | 0 | SUIRE SES |  |
| Step5 | Setting process | [*] |  |  |  | ---OK--- |  |
| Step6 | Setting finished and go to next item |  | 5436 |  | ------- | LINER RELUIVIT |  |

Once the way to delete reports is set as manual, the time to delete reports will be decided by you. You may delete all reports in setting item 303, except weekly, monthly and yearly reports. The time when reports are deleted will become the beginning time of the new reports.

### 5.4.6.3 Delete All Reports

You may delete all reports in the setting item 304. Resetting the scale in the setting 305 also can delete all reports, but
be careful, as it also deletes all data in the scale. Please think it over before resetting the scale.
5.4.6.4 Restore Default of Group 6 (601)

| Procedure | Description | Key operation | $\begin{aligned} & \text { Display } \\ & \text { on } 1^{\text {st }} \text { line } \end{aligned}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {d }} \text { line } \\ \hline \end{gathered}$ | Display on the bottom line | $\begin{aligned} & \text { Lit } \\ & \text { cursor } \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step 1 | In setup mode | ------ | GR 07 |  | ------- | INFOT INPUT |  |
| Step2 | Access to 601 to restore default | [6][0][1] | 5607 |  | ------- | RESTGRE DEF |  |
| Step3 | Don't restore | [*] | 5607 |  |  |  |  |
| Step4 | Select to restore | $[\rightarrow T \leftarrow]$ | 5607 |  |  | DEFPOHT SES |  |
| Step5 | Confirm and go to next item | [*] | 5602 |  | ------- | SALES RPT |  |

### 5.4.6.5 Combination Report(616)

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | Display on $1^{\text {st }}$ line | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \\ \hline \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on } 3^{\text {rd }} \text { line } \\ \hline \end{array}$ | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { Lit } \\ \text { cursor } \\ \hline \end{array}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step1 | In setup mode, "GR XX" is shown. e.g. "Gr 01" | ----- | 6907 |  | ------- | IMFO IMPUT |  |
| Step2 |  | [6][1][6] | 5616 |  | ------- | COMBIME RPT |  |
| Step3 | *Default show 602 isn't included in combination report | [*] | 5615 |  | 602 MO | SRLES REPORT |  |
| Step4 | Change no to yes to let 602 included | $[\rightarrow T \leftarrow]$ | 5516 |  | 602 Ye5 | SRLES REPORT |  |
| Step5 | 603 is not combined | [*] | 5516 |  | 603 MO | PLU REPORT |  |
| Step6 | To select which reports will be combined one by one | --- |  |  |  |  |  |
| Step7 | Default is not to print report | [*] | 5516 |  |  | NOT PRIINT |  |
| Step8 | Don't print and go to next item | [*] | 5617 |  | ---- | PROMOTE RPT |  |

When printing combination report, all combined reports will be printed at one time.

* At this step, press [X] key to select to print all reports at one time, at this time, "RLL RANGE" will be shown on the display.

### 5.4.6.6 $\log (617)$

In this item, you may print 3 kinds of log: sales log, promotion log and void/ST log.

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{aligned} & \text { Display } \\ & \text { on } 1^{\text {st }} \text { line } \end{aligned}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {rd }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \\ \hline \end{gathered}$ | $\begin{array}{\|c} \hline \text { Lit } \\ \text { cursor } \end{array}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step 1 | In setup mode, " GR XX " is shown. e.g. " Gr $01 "$ | --- | GR 07 |  | ------- | INFO IMPUT |  |
| Step2 | Access to log setting | [6][1][7] | S 617 |  | ------- | 106 |  |
| Step3 | Default to print sales log | [*] | $5 \quad 617$ |  |  | STlLES LOG |  |
| Step4 | Select promotion log | $[\rightarrow T \leftarrow]$ | 5617 |  |  | PROTOTE LOG |  |
| Step5 | Select to print void/ST report | $[\rightarrow T \leftarrow]$ | 5617 |  |  | RETURN LOG |  |
| Step6 | Beginning ticket \#: 1* | [*][1] | 5617 |  | 1 | FROM T M H . |  |
| Step7 | End ticket \#: 100** | [*][1][0][0] | $5 \quad 617$ |  | 100 | TO T MO. |  |
| Step8 | Don't print | [*] | $5 \quad 617$ |  | STLE | HIDT PRIMT |  |
| Step9 | Go back to next step | [*] |  |  |  | SRLES LOG |  |

* Default is the number of the first ticket, the date inserted should be more than this number..
** Default is the number of last ticket, the date inserted should be less than this number.

## RS Series Service Manual

### 5.4.6.7 Setting Procedure/Setting Items/Default (602~614)

After accessing the relevant setting item, follow the steps below to edit report.

| Procedure | Instruction |  | S 602 | S 603 | S 604 | S 605 | S 606 | S 607 | S 608 | S 609 | S 610 | S 611 | S 612 | S 613 | S 614 | S 615 | Default |

| Step4 | Alternative is slaver | $[\rightarrow \mathrm{T}<$ ] | 5702 |  |  | SLIVER |  |
| Step5 | Insert the local IP address of slaver | [*] | 5702 | SIIVER | INC RL |  |  |
| Step6 | Insert the local IP address | $\begin{aligned} & L] \\ & {\left[\begin{array}{l} {[1][7][2][0][3][3]} \\ [0][0][0] 7][2][1] \\ {[88]} \end{array}\right.} \end{aligned}$ | 5702 | SLIVER | 10cht | 172030007218 |  |
| Step7 | Insert the mask code | [*] | 5702 | SIAVER | M M ST |  |  |
| Step8 | Insert the mask code | $\begin{aligned} & {[2][5][5][2][5][5]} \\ & {[2][4][8][0][0][0]} \end{aligned}$ | 5702 | SLIVER | MRST | 255255248000 |  |
| Step9 | Insert the idle time | [*] | 5702 | SIAVER |  | IDLE (m5) |  |
| Step 10 | Insert the idle time: 10s | [1][0] | 5702 | SIAVER | 10 | IDLE (m5) |  |
| Step 11 | Insert the IP address of this slaver's host |  | 5702 | SLIVER | H05T IP | 172400000000 |  |
| Step12 | Insert the IP of router | [*] | 5702 | SIIVER | ROUTE IP | 000000000000 |  |
| Step13 | Insert the mask of route | [*] | 5702 | MAR | RODRESS | 020305070907 |  |
| Step 14 | Default is not real-time output, real-time output is alternative. | [*] | 5702 |  | 140 | RERL-TIME |  |
| Step15 | Exit and go to next setting item | [*] | 5703 |  | ------ | R5232 |  |

### 5.4.7.4 Work Modes (703)

RS Series has three work modes:Stand Alone,FV Slave and FV Master. Stand Alone is the traditional work mode, and the FV Slave and FV Master concern to the new one: Floating Vendor Function. For details, please check the Appendix A.

### 5.4.8 Password Management (Group 8)

Group 8 has two items: 801 password edit and 802 authority edit.

### 5.4.8.1 Password Management

There are 4 passwords; the related information is as follows:

| Item | Vendor's password | Manager's <br> password | Boss's password | Service's pass <br> word |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| How to insert <br> password | Insert the ID \#, then password |  |  |  |  |
| ID \# | Vendor key. E.g. [V1] key | [2] key | [1] key | [PLU] key |  |

RS Series Service Manual

| Default password | No password | 666666 | 888888 | 246813 |
| :---: | :---: | :---: | :---: | :---: |
| Default authority | No | $\begin{aligned} & \text { Can edit group } \\ & 1,2,4,6,7 \\ & \hline \end{aligned}$ | $\begin{array}{\|l\|} \hline \text { Can edit group } \\ 1,2,3,4,6,7,8 \\ \hline \end{array}$ | Can edit all setting items |
| Edit | The default can be changed in setting 801 |  |  | Cannot be changed |
| Authority is given by | Boss | Boss | Service man | Cannot be edited |
| Can be changed by | Vendor/Manager/Boss/Service | Manager/Boss/Servi ce | Boss/Service |  |

### 5.4.8.2 Password Edit (801)

For example: change boss's password to 123456

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \hline \text { Display } \\ \text { on } 1^{\text {st }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {d d }} \text { line } \end{gathered}$ | Display on the bottom line | $\begin{gathered} \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step 1 | In setup mode, " $G R X X$ " is shown. e.g. " Gr 01 " | ------ | 5 S 071 |  | ------- | INFO INTPUT |  |
| Step2 | Access to setting 801 | [8][0][1] | 5807 |  | ------- | PU MRIMAGER |  |
| Step3 | Default edit the password of manager | [*] | 5807 |  | [HG Pu | TRMAIGER PU |  |
| Step4 | Select to edit vendor's password | $[\rightarrow T \leftarrow]$ | 5807 |  | [HG Pu | VEMVIR PU |  |
| Step5 | Select to edit boss's password | $[\rightarrow T \leftarrow]$ | 5807 |  | [HG Pu | 8055 Pu |  |
| Step6 | Insert the new password | [*] | 5807 | [HG Pu | 8055 | NEW |  |
| Step7 | Insert the new password | [1][2][3][4][5][6] | 5807 | [HG Pu | 8055 | *MEIU ****** |  |
| Step8 | Insert the new password again | [** [1][2][3][4][5][6] | 5807 | CHG Pu | 8055 | **RGRIIIV****** |  |
| Step9 | Edit manager's password | [*] | 5807 | [HG Pu |  | manimiotr |  |

Notice: If the data inserted the second time is not the same as that inserted the 1st time, then "PW ERROR" will be displayed for a while for requirement again.
If you don't insert anything when new password is required, and press [*], then the previous password will be deleted.
When editing vendor's password, vendor \# is required as follows:

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } \mathrm{s}^{\text {st }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {rd }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{gathered} \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step10 | Edit vendor's password | $[\rightarrow \mathrm{T}<]$ | 5807 |  | CHG PU | VEMDOR PU |  |
| Step11 | Default edit Vendor 1, insert 2 | [*][2] | 5807 | CHG PW | VEMDOR 2 | IHPUT VENTOOR |  |
| Step12 | Insert the new password | [*][1][2][3][4] |  | CHG PU | VEIMDOR 2 | NELU ***** |  |
| Step13 |  | ------ |  | CHG PW |  |  |  |

5.4.8.3 Authority (802)

Setting item 802 is available only when you access setup mode with boss or service password.
For example: Access to setup mode with boss's password, set the authority of vendor as follows. The authority will include group 1 and setting item 801 . After a vendor has this authority, he can access to any setting item in group 1 and setting item 801.

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on } 1^{\text {st }} \text { line } \\ \hline \end{array}$ | $\begin{gathered} \text { Display } \\ \text { on } 2^{n d} \text { line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {rd }} \text { line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { Lit } \\ \text { cursor } \\ \hline \end{array}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step 14 | In setup mode, " $G R X X$ " is shown. e.g. " Gr 01 " | ------ | G 607 |  | ------ | MFFO INTUUT |  |
| Step15 | Access to setting 802 | [8][0][2] | 5802 |  | ------- | RIGHT LIMIT |  |
| Step16 | Default edit vendor's authority, press tare key may select to edit manager's. | [*] | 5802 |  | RIGHT L | VEYMOR |  |
| Step17 | Default authority is none. | [*] | 5802 |  | VEYIDOR |  |  |
| Step18 | Add authority to edit group 1 and setting 801 | [+][1][+]][8][0][1] | 5802 |  | LUMVOOR | * + + +807 |  |
| Step19 | Edit manager's authority | [*] | 5802 |  | RIGHT L | VEYMDOR |  |
| Step20 | Exit and go to next item | [MODE] | 5807 |  | ---- | PU MRAMGER |  |

*+ means add authority, - means delete authority, "all" means all groups except group 5.
E.g.: +1-106 means add authority to edit all setting items in grouplexcept item 106.

If inputted data is not valid, "input error" will be shown, and you must insert new data.

## 6 Connection Diagram

## 7 Scale Structure

### 7.1 Explosion Drawing

### 7.2 Parts list

| ID | CIMF | Description | Picture |
| :---: | :---: | :---: | :---: |
| 50 | 72174057 | Right block, column top cover |  |
| 49 | 72174059 | Top cover, plastic column |  |
| 48 | 72191898 | RS Display filter, tower, 15kg, $€$ |  |
| 47 | 72172326 | Front cover, plastic, tower |  |
| 46 | 72181192 | PCB subassembly, tower display |  |
| 45 | 72174118 | Tie-in between tower display and tower |  |
| 44 | 72172327 | Back cover, plastic, tower |  |
| 43 | 72174058 | Left block, top cover of column |  |
| 42 | 72174563 | Rubber washer, slip-proof, tower |  |
| 41 | 72172332 | Platter |  |
| 40 | 72172320 | Battery cover |  |
| 39 | 72135242 | Cockroach ring |  |

RS Series Service Manual

| 13 | 72174570 | Power harness |  |

## 8 Sevice

### 8.1 Very Important Notice

Before opening the scale, please assure to disconnect the power cord from the scale.
Only qualified serviceman may open the scale for service.
Be careful about static power by wearing static-proof wrist belt when touch PCB

### 8.2 Change Parts

### 8.2.1 Open Scale

The procedure to open the scale is as follows:

1. Put the scale upside down
2. All fixing screws are in the holes circled in red
3. Unscrews all fixing screws (Don't press the scale heavily, specially for 3 kg scale)
4. Put the scale upward, and open the up cover a little
5. Because the keyboard is connected with main PCB, please pull the display cable out, then remove the up cover

8.2.2 Change A/D PCB
6. Open the scale;
7. Disconnect all cables plugged in main PCB;
8. Remove main PCB to see A/D PCB;
9. Disconnect the load cell cable, and remove the old A/D board;
10. Install the new PCB in the same way with reverse procedure.

### 8.2.3 Change Load cell

1. Open the scale, remove main PCB
2. Pull the load cell cable out of $A / D$ PCB
3. Put the plus driver through the hole in the spider to remove one screw which used to fix the triangle metal cover for load cell seal;
4. Put the scale right side down to remove the cover;
5. Use screw driver to unscrew the 2 Allen screws (M6x20mm)

6. Take 2 Allen screws and one aluminum washer out. Be careful not forget to install this wash when install load cell;
7. Use Allen screw driver to unscrew the 2 Allen screws to fix load cell
8. Separate load cell from spider

9. Install a new one as the way in the last 2 slides, but reverse procedure
10. Put the rubber bumper on 4 columns on the corner of spider, and put the platter on the spider;
11. Adjust the shift of the load cell;
12. There are 6 overload stops, 4 on the 4 corners, 2 on the middle of spider
13. Adjust the overload gaps, the used weight is as follows:

| Capacity | 3 kg | 6 kg | 15 kg | 30 kg |
| :--- | :---: | :---: | :---: | :---: |
| Overload stop weight | 4.5 kg | 9 kg | 22.5 kg | 40 kg |

14. Put the weight on the following positions of the platter respectively, and adjust the overload stop screw under weight to assure the overload stop gap is just closed.
15. After overload gap adjustment finished, remove the platter
16. Connect load cell with A/D board, and connect all other cable well, install the up cover, put the platter on.

### 8.2.4 Change Power Switch

1. Open scale, remove all scales connected with power switch PCB;
2. Be careful that one fixing screw is under the spider. Please put the plus screw driver through a hole in the scale to unscrew it;
3. Remove the old one, put a new one on, and install all fixing screws, and connect all related cables;
4. Install the up cover.

### 8.2.5 Change Fuse

The Fuse is $125 \mathrm{~V} / 3 \mathrm{~A}$, The way to change it is as follows:

1. Fuse is in the power socket of the scale;
2. Use a screw driver to prize up the cover of the fuse box;
3. Take out the fuse with its box;
4. Remove the old one, and put a new one in
5. Put the fuse box back and cover the holder cover;
6. Press the cover heavily to assure it is fixed well.

### 8.2.6 Change Printer Head

1. Open scale, disconnect all cables on the printing PCB;
2. Remove all screws to fix printing bracket

Be careful that one screw is under the spider, the plus crew driver should put trough a hole in the spider to unscrew
3. Take out printing bracket with printing PCB and printer head;
4. Remove 3 screws to fix printer head onto the bracket as illustrated

5. Disconnect the printer head cable and sensor cable from printing PCB;
6. Remove the printer head;
7. Install a new one in the same way, but procedure is reverse.

## 9 Update Software

There are 2 softwares, boot and application software. Both can be flashed through COM2 and Ethernet in the same way. The methods are described in the next 2 sections.
Notice: Please don't use Ethernet to flash boot software because if through Ethernet, any interruption during the process of flashing may result in collapse of system.

### 9.1 Update Software with HyperTerminal

Preparation: Connect RS232 to the PC and COM 2 of the scale.

## Steps:

1. Open the menu in Windows: "Start" , "Programs", "Annex", "Communication", "Hyper Terminal ".

Figure 1-1
2. Figure 1-2 comes out, input the new name and select one icon, click the button"OK".

Figure 1-2

Figure 1-3
3. Then the figure 1-3 turns out, select COM port, click the button "OK" to finish it.

Figure 1-4
4. Figure 1-4 appears. Select suitable parameters, baud rate is 115200 , others are shown in the figure.
5. Press and hold key [*] to turn on scale. "Wait 4 host" will be shown to indicate the scale is in software flash waiting mode.
6. Click the button 'OK' in figure 1-4, it will show as follow:

Figure 1-5
7. After figure 1-5 appears, open the menu "Transfer", "Send", then "Send file", the figure 1-6 turns out. Find the soffware needed through the button "Browser", and then select " 1 k Xmodom" in "Protocol". Press the button "OK".

Figure 1-6
8. Figure 1-7 appears, indicating the process of sending.

| Sending: | D: \pro3700\source\appl\bin\builddRS. dat |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Packet: | 218 | Error checking: | CRC |  |  |
| Retries: |  | Total retries: | 1 |  |  |
| Last error: | Got retry request |  |  |  |  |
| File: | [111 |  |  | 215 K of 2078 K |  |
| Elapsed: | 00:00:29 | Remaining: | 00:04:11 | Throughput: | 7591 cps |
|  |  |  |  | Cancel | cps/bps |

Figure 1-7
9. The dialogue will disappear automatically after the process of sending
10. The scale will self-check and get to weighing mode.

Notice: After software update, if "Error 203" is shown on the screen, please press [Mode], then [ $\rightarrow \mathrm{T} \leftarrow$ ], and then [*] to reset the scale.

### 9.2 Update Software Through Ethernet

IP confiture:
If your scale and PC are connected by cross cable, please do the following actions:

1. Configure the Scale IP and Net Mask in function 702;
2. Print the scale Internal Paremeter,[Mode] + [L];
3. Access to the TCP/IP setting as the following figure show:

Figure 2-1
4. Configure the PC IP in function 702, set the PC IP similar to the scale one, such as "172.30.7.201" in scale and "172.30.7.200" in PC.
5. Configure the PC Net Mask in function 702, set scale and PC `s Net Mask same.
6. Press [ok] to save the setting and exit.

If your scale and PC connecte to the Router which is DHCP enable, please do the following actions:

1. Press [start]->[run]->[cmd]->[ok], then a windows console display:

2. Input the command: "ipconfig", and press [Enter], in order to showing the ip parameter.

3. Configure the scale IP in function 702, set the scale IP similar to the PC ip, such as PC ip is "172.30.3.91", and the scale IP is "172.30.3.92";
4. Configure the scale Net mask in function 702, set the scale Net Mask same as the PC Net Mask.;

## After finish the IP configure, then do the Ethernet update: <br> Steps:

1. Put udpflash.exe and udpflash.ini in any directory of the PC, click the logo "udpflash.exe" twice and the interface will display as follow:

Figure 2-2
Input scale IP address in "Remote Scale IP" and select the application software by pressing the "Browser" button.
2. Press and hole the [V1] key to turn on the scale, the display will show "NETWORK FLASH".
3. The process shown as follow will come out after clicking the "Start" button. When the process is finished, the prompt of finished will come out.

Figure 2-3

Figure 2-4
Notice: After software update, if "Error 203" is shown on the screen, please press [Mode], then [ $\rightarrow \mathrm{T} \leftarrow$ ], and then [*] to reset the scale.

## 10 Error Shooting

### 10.1 Warning

Warning information will occur when an operation is wrong. Usually this information is displayed on the bottom line for about 1 second. It can be cleared by pressing key [C].

| Prompt | Instruction |
| :---: | :---: |
| TOO Smill | Insert data is too small |
| IMPUT ERROR | Insert error |
| MEm ERROR | Error occurs when setting information is being written into memory |
| Flif liyable | This function is disabled |
| 0 TOO SmRLL | Zero value is too small in the process of calibration |
| 0 TOO LARGE | Zero value is too large in the process of calibration |
| WT TOO SmRLL | The loaded weight is too small in the process of calibration |
| WT TOO LARGE | The loaded weight is too large in the process of calibration |
| UEIGHT RGRIII | The weight does not change before accumulation |
| WT TOO SmRLl | The weight is less than 20e when printing label or accumulation |
| WT TOO HERV' | The weight on the platter is more than full capacity plus 9 e |
| MO STRTABLE | The weight is not stable when scale is turned on |
| COMF. ERROR | The configuration is not right when the scale is turned on |
| Bmolivi is 0 | The total price is 0 when printing label or accumulation of transaction |
| MO THIS PLU | PLU is not found when recall PLU |
| TRRE TOO BIG | Preset tare is more than full capacity |
| MOT LOG IIM | Operator has not logged in |
| CHPNME PRPER | No paper |
| URONG VEMVIOR | Operator doesn't exist |
| NO DISCOLIMT | The discount has not been preset |

RS Series Service Manual

| DISC ITIPOS5 | Does not meet discount condition |
| :--- | :--- |
| NOU VOID | There is no transaction which could be voided |
| NIO CUST MET | There is no record of customer in the database |
| TEMORS FULL | Memory is full |
| ERROR 203 | Check sum of data base is wrong |

### 10.2 Error Shooting

The follow error will not disappear until the problem is solved.

| Error | Reason | Solution |
| :---: | :---: | :---: |
| E300 PRIMTER | Circuit error of printing driver | Change Main PCB |
| E301 PRIMTER | Circuit error of printing driver | 1) Update Software; 2) Change main PCB |
| E307 PRIMTER | Printer head error | 1) Change print head; 2) Change header cable; 3) Change main PCB |
| E308 printer | Circuit error of printing driver | Change main PCB |
| E310 PRIMTER | Circuit error of printing driver | Change main PCB |
| E100 CHECKSU | Software error | 1) Update software; 2) Change EPPROM; 3) Change main PCB |
| E101 AP | Circuit error of Real time clock | Change main PCB |
| E400 CELL | Output of load cell is too small | 1) Change main PCB; 2) Change load cell |
| E 401 CELL | Calibration parameter error | 1) Calibrate scale; 2) Change main PCB; 3) Change load cell |
| E200 DRTRBRS | data base error | 1) Reset scale; 2) Change main PCB |
| ELO1 X ORTR | data base error | 1) Delete $X X$ data; ; 2) Reset scale; 3Change main PCB |
| E202 $3408 T R$ | data base error | 1) Delete YY data; 2) Reset scale; 3Change main PCB |
| E203 27 DRTA | data base error | 1) Configure ZZ data; 2) Reset scale; 3) Change main PCB |
|  | data base error | 1) Reset scale; 2) Change main PCB |

| *XX: data code | *YY: data code | *ZZ: data code |
| :--- | :--- | :--- |
| 01: vendor statistic data | 01: vendor statistic data | 01: vendor configuration |
| 02: ticket statistic data | 02: ticket statistic data | 03: keyboard configuration |
| 03: date statistic data | 03: date statistic data | 04: code configuration |
| 04: text data | 04: text data |  |
| 05:EAN format data | 05:EAN format data |  |
| 06: tare data | 06: tare data |  |
| 07: group data | 07: group data |  |
| 15: date instruction data | 15: date instruction data |  |
| 23: store name | 24: PLU data |  |
| 24: PLU data |  |  |

## 11 Appendix A:

## Floating Vendor Function

In FV (Floating Vendor) mode, all scales in the network will share the data in the master scale. You may do business on anyone scale like all scales in the network as one scale, so the ticket can be printed on any scales.

## 1. How to set a FV network

The scale should have an Ethernet port. If only 2 scales connect with each other, you may use a cross cable to join them together. If there are at least 3 scales in the network, one hub will be needed for a FV network.

Workstation

### 1.1 Configured by Cross Cable

### 1.1.1 Device Requirements

Two scales are able to make a FV network by using a cross cable, see device list as below:

| FV Function Devices List (Cross Cable) |  |  |
| :---: | :---: | :---: |
| 1 | RS Series with the Ethernet Port | 2 Units |
| 2 | Cross Cable * | 1 Piece |

* Pay attention please: there are two types of the Net Cable, the one is direct cable, and another is cross cable. Please check the cable type before you connect with two scales.

### 1.1.2 Devices Setup

Put one head of the cross cable into the Ethernet Port of one RS Series, which we name Scale A and then put another head into the Ethernet Port of another RS Series, which we call Scale B.

### 1.1.3 Software Set up

There are two parts of the software setup, the one inputs scale IP in the function 702, and the other builds up the relationship of FV Network in function 703.

### 1.1.4 IP Configure(702)

| IP configure in 702 |  |  |
| :---: | :--- | :--- |
| Procedure | Operation | Description |
| 1 | $[$ Mode $],[1],[888888],\left[^{*}\right]$ | Access to the Setting Mode |
| 2 | $[$ Mode $],[702],\left[^{*}\right]$ | Access to Function 702 |
| 3 | $\left[{ }^{*}\right],[172030007200],\left[^{*}\right]$ | Configure the Scale IP as <br> 172.30 .7 .200 |
| 4 | $[255255248000],\left[^{*}\right]$ | Configure the Net Mask |
| 5 | $\left[^{*}\right],\left[^{*}\right],\left[^{*}\right]$ | Finish the Procedure |

According to the above steps; please input the IP of scale A with "172.30.7.200" and scale B with "172.30.7.201".

### 1.1.5 FV relationship Configure

The following steps are showing how to set up the relationship of FV Network.
We will use two steps to build up the FV relationship by configuring Master Scale and slave Scale.
At first, we must configure Master Scale.

| the Master Scale Configure |  |  |
| :---: | :---: | :---: |
| Procedure | Operation | Description |
| 1 | $[$ Mode $\left.],[1],[888888],{ }^{*}\right]$ | Access to the Setting Mode |

| 2 | $[$ Mode $],[703],[*]$ | Access to the Works Mode |
| :--- | :--- | :--- |
| 3 | $[->\mathrm{T}<-],[->\mathrm{T}<-]$ | Select the FV Master |
| 4 | $[*]$ | Confirm |

After doing above procedure successfully, the scale is configured as FV Master scale, of course the FV Network will use all data that store in scale A, such as PLU, Discount etc. The symbol will be showed in the screen of scale A for giving you a notice that this scale is the Master scale now.
Second, we set up the Slave one.

| Configure the Slave Scale |  |  |
| :---: | :--- | :--- |
| Procedure | Operation | Description |
| 1 | $[$ Mode $],[1],[888888],\left[^{*}\right]$ | Access to the Setting Mode |
| 2 | $[$ Mode $],[703],\left[^{*}\right]$ | Access to the Works Mode |
| 3 | $[->T<-]$ | Select the FV Slave |
| 4 | $[*]$ | Confirm |

After finishing this procedure, the bottom line of the RS Series screen will show "Update Data....", meanwhile the scale B (slave scale) is copying the data from the scale A (master scale). Please make sure that the communication is running smoothly at this moment, especially do not pull out the cable. This process will be lasted nearly 60 seconds, please wait for a moment.
The scale B will show at the bottom line of the screen, when the data transform successfully. When the Net symbols of these two scales are glitter, the FV network is OK.

### 1.2 HUB Configure

### 1.2.1 Devices Requirement

If you want to make FV network includes two more scales, you have to use the HUB for help. See the devices list as below:

| FV Function Devices List (HUB) |  |  |
| :---: | :---: | :---: |
| 1 | RS Series with the Ethernet Port | 3 or more Units |
| 2 | Cross Cable * | 3 or more Piece |
| 3 | HUB | 1 Unit |

* Pay attention please: there are two types of the Net Cable, the one is direct cable, and another is cross cable. Please check the cable type before you connect with two scales.

### 1.2.2 Devices Setup

Put one head of the Direct Net Cable into the RS Series Ethernet Port and another head connect to the HUB. Repeat this step to connect all scales with the HUB.

### 1.2.3 Software Setup

Also there are two parts of the software setup, the one is IP configure, another is relationship setting.
For the IP configure, the range of the IP address is from"172.30.7.200" to "172.30.7.254", and 1.1.4 is for your reference.
For relationship configure of FV network, set the only one scale as the FV master scale and the others as the FV slave scales. Of course, when slave scales are enabled, they will read the data from the Master one. More scales cost much more time, of course the network environment efforts the total time.

### 1.3 Exit FV Mode

The following introduces two parts of how to exit the FV function.

| 703 Exit the FV Function(Slave) |  |  |
| :---: | :--- | :--- |
| Procedure | Operation | Description |
| 1 | $[$ Mode $],[1],[888888],[$ Mode $]$ | Access to the Setting Mode |
| 2 | $[$ Mode $][703],\left[^{*}\right]$ | Access to the Works Mode |
| 3 | $[0],\left[^{*}\right]$ | Select the Stand Alone |

| 4 | $[1],\left[^{*}\right]$ | Select copy the data from <br> master scale |
| :---: | :--- | :--- |
| 5 | $[$ Mode $][$ Mode $]$ | Exit to the Weight Mode |

If you execute the setp 4, the scale will read the PLU data from Master scale to local scale.

| 703 Exit the FV Function(Master) |  |  |
| :---: | :--- | :--- |
| Procedure | Operation | Description |
| 1 | $[$ Mode $],[1],[888888],[$ Mode $]$ | Access to the Setting Mode |
| 2 | $[$ Mode $][703],\left[^{*}\right]$ | Acess to the Work Mode |
| 3 | $[0],\left[^{*}\right]$ | Select the Stand Alone |
| 4 | $\left[1,\left[^{*}\right]\right.$ | Select to print the report** |
| 5 | $\left[1,\left[^{*}\right]\right.$ | Select to del all the report |
| 6 | $[$ Mode $],[$ Mode $]$ | Exit to the Weight Mode |

*The report is concerns the setting of function 616.

## 2. Basic Operation under the FV Function

### 2.1 Basic Business

As we said at the beginning of this appendix, RS Series FV function will bring out a fire-new experience when you use it. Please enjoy it along with our following example.

| New Business Progress of FV Function |  |  |  |
| :---: | :---: | :---: | :---: |
| Procedure | Scale | Operation | Description |
| 1 | Slave A | Put the weight on the platter, [5] | Call PLU 5 |
| 2 | Slave A | [V1] | Accumulate to V 1 |
| 3 | Slave B | Put the weight on the platter, [6] | Call PLU 6 |
| 4 | Slave B | [V1] | Accumulate to V 1 |
| 5 | Slave A | Put the weight on the platter, [7] | Call PLU 7 |
| 6 | Slave A | [V1] | Accumulate to VI |
| 7 | Slave B | [V1] | Call the Total of V1 |
| 8 | Slave B | [*] | Check out by the cash |
| 9 | Slave B | [100] | Input the payment |
| 10 | Slave B | [*] | Print the ticket |
| 11 | Master | [Mode], [1], [888888], [*] | Access to the set mode |
| 12 | Master | [602], [*] | Access to sales report |
| 13 | Master | [**, [*],[->><-],[*] | Print the report |

Check the ticket and sales report, there are three deals on it, and the PLU number is 5, 6,7, the "payment" is 100.00. The sales report includes correct value of the above operations. The discount and the other function that stand alone available are all ok on the FV network.

### 2.2 Master Scale in the FV Function

The operations and menu of Master scale are same as the stand alone one.

### 2.3 Slave Scale in the FV Function

When the scale is set as slave scale in the FV network, only three functions is available, there are 305,701,703.
For 703, it is used for backing to the stand alone, and 701 is used for the serial port configure, and the 305 is used for set the RS Series to default after the accident.

## 3. Attentions

1. Scanner is support to the FV feature?
2. Absolutely, in the FV Network, there is only one scale as Master Scale.
3. Please to make sure that you must turn on the master scale first, and then slave one.
4. Slave scale will update the data after turning on the scale.
5. Please do NOT modify the scale IP when the scale on the FV network.
6. The HUB which is used for the FV network, please do NOT connect it to the WLAN.
7. When the data transforming, please make the network run well.

## 4. Menu Descritption

The following list shows the details of the FV function, it is for your reference.

### 4.1 Group 1

| RS Series Group 1 FV Feature List |  |  |  |
| :---: | :--- | :---: | :---: |
| Menu | Description | FV Available | Data Update Method |
| 101 | PLU edit | Available | Real-time |
| 102 | Price change | Available | Real-time |
| 103 | PLU content | Unavailable | N/A |
| 104 | Group edit | Available | Real-time |
| 105 | Vendor edit | Available | Real-time |
| 106 | Date/time | Available | Real-time |
| 107 | Shop edit | Available | Real-time |
| 108 | Scale no. | Unavailable | N/A |
| 109 | Head/footer | Available | Real-time |
| 110 | Extra text | Unavailable | N/A |
| 111 | Tare edit | Available | Real-time |
| 112 | Bar code | Available | Real-time |
| 113 | Bar c VS T/L | Available | Real-time |
| 114 | Inventory | Unavailable | N/A |

## 12 Appendix B:

## Farm Function and Manual Tare

## 1. Farm function

### 1.1 Menu

| 444 | Farm function | FRRM FLINLTIO | Disable farm function | FRRM FLIM MO | Enable farm function | FRRRM FLIM SES | NO |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 445 | Manual tare | marwirl tane | Disable Manual tare | IT TRRE MO | Enable farm function | If TRRE SES | NO |

When farm function is enabled, key [V] will be defined as tare memory key, and key [_] will be defined as tare recall key. In this case these 2 keys can not be used as preset keys.
When manual tare is enabled, key $[\mathrm{P}]$ will be defined as manual tare key. In this case this key can not be used as preset key.

### 1.2 Business Progress

### 1.2.1 Memory the Basket Weight

The customer brings his own basket. The salesman puts it on the scales then press the special function key to memorize the basket weight. The scale prints a ticket which includes the basket number and its weight. The customer must keep this ticket until he goes back to the cash deck.

| Procedure | Description | Operation | Display on 1st line | $\begin{gathered} \text { Display } \\ \text { on 2nd line } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on 3rd line } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{gathered} \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | Weigh mode |  | 0.000 | 0.00 | 0.00 | U7 TICKET |  |
| 2 | Put the basket on the platter |  | 0.200 | 0.00 | 0.00 | U7 TICKET |  |
| 3 | Press basket memory key [V] | [V] | 0.000 | 0.00 | 0.00 | U7 TICKET | MET |
| 4 | Print a ticket for basket |  | 0.000 | 0.00 | 0.00 | PT 0.200 | MET |
| 5 | Remove the basket |  | 0.000 | 0.00 | 0.00 | U7 TICKET |  |

| Ticket to keep |
| :---: |
| Date: 1/5/2006 15:30 |

Basket No.: 10
Tare: 0.250 kg

BN will be as the ID code of basket no.

* Basket memorizing is not possible if there's customer amount in progress.
* The scales can memorize 9999 baskets (Customer).
- During this phase, if the scale has a tare (semi automatic or preset), basket memorizing is impossible.
- This is a network function, so the basket number must be unique in the whole network.

### 1.2.2 Recall a basket weight

Back to the cash desk, the customer gives his ticket. The salesman press the function key "Basket recall", then enters the ticket number and validates with key. The basket number recall does as preset tare. The basket weight is displayed in the tare area (with the PT Information). The transaction can go on as usual. The basket weight is erased as soon as the transaction is printed. Tare displaying is deleted when scales returns to zero.
Notice:

- Operator put full basket on the platter and enters the basket number. (The operator does decide by himself in which order he wants to operate, first PLU and then basket number or first basket number and then PLU)
$\rightarrow$ If a barcode reader is connected, the basket number should be read in by the scanner.

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } \mathrm{l}^{\text {st }} \text { line } \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on } 2^{\text {nd }} \text { line } \end{array}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {rd }} \text { line } \end{gathered}$ | Display on the bottom line | $\begin{gathered} \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step 1 | After do some transactions, back to weigh mode |  | 0.000 | 0.00 | 0.00 | $\begin{array}{lll\|}  & P 1 & P Z \\ 10.00 & & \\ \hline \end{array}$ |  |
| Step2 | Put the basket with items on the platter |  | 1.200 | 0.00 | 0.00 | U TICKET |  |
| Step3 | Press basket recall key [_] and basket number (e.g.: basket number is 3 ) to recall basket weight | [ь][3] | 1.000 | 0.00 | 0.00 | $0.200{ }^{P T}$ | NET |
| Step4 | Recall a PLU or input unit price | [1] | 1.000 | 2.00 | 2.00 | PLU 1 PT 0.200 | NET |
| Step5 | Press operator key to accumulate the total price | [V1] | 1.200 | 0.00 | 0.00 | $\begin{array}{\|lll\|} \hline \eta & P 3 & T \\ 12.00 & & \\ \hline \end{array}$ |  |
| Step6 | Do other transactions as usual |  |  |  |  |  |  |

or During the basket recall, the scales must not have semi-automatic tare, otherwise "ERR T reject" is temporary displayed.

* If you're doing a sales by calling PLU with preset tare included, "ERR T in use" is temporary displayed, and the scales ignores PLU's preset tare. The basket tare priors the preset tare called by PLU.
- Successive basket recall is possible.

### 1.2.3 Basket Report

At the end of the day it should be possible to receive a list of non used/recalled baskets and then to decide to clear them or not. The detail operation is as follows:

| Procedure | Description | $\begin{gathered} \text { Key } \\ \text { operation } \\ \hline \end{gathered}$ | $\begin{gathered} \text { Display } \\ \text { on } 1^{\text {st }} \text { line } \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on 2 } 2^{\text {nd }} \text { line } \\ \hline \end{array}$ | $\begin{gathered} \text { Display } \\ \text { on } 3^{\text {rd }} \text { line } \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { Display } \\ \text { on the botiom line } \end{array}$ | $\begin{array}{\|c} \hline \text { Lit } \\ \text { cursor } \end{array}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step1 | -----Get to 618 (added basket report) | [6][1][8] | 5518 |  | ------- | BRSKET RPT |  |
| Step2 | Default is not to print report | [*] | $\begin{array}{ll}5 & 518\end{array}$ |  |  | PRIITT MO |  |
| Step3 | Select to print report | $[\rightarrow T \leftarrow]$ | $\begin{array}{ll}5 & 518\end{array}$ |  |  | PRIINT YES |  |
| Step4 | Print report and go to next step | [*] | $\begin{array}{ll}5 & 518\end{array}$ |  |  | DELETE NO |  |
| Step5 | Default is not to delete report |  | $\begin{array}{ll}5 & 618\end{array}$ |  |  | DELETE NO |  |
| Step6 | Select to delete report | $[\rightarrow T \leftarrow]$ | $5 \quad 518$ |  |  | DELETE YES |  |
| Step7 | Go to next setting item | [*] |  |  |  |  |  |

Once the basket report is deleted, the basket number will be reset to 1 .
If the basket number is up to 9999, but the customer still doesn't delete the report, the report will be printed and deleted automatically, and the basket number will be reset to 1 .

### 1.2.4 Ticket format

In the ticket, the basket weight information will be printed as follows:

| Basket Report <br> ************************* |  |  |
| :---: | :---: | :---: |
| ```From 2005-12-08 15:56 To 2006-011-05 19:00 Scale #.:01``` |  |  |
| Not used basket number list |  |  |
| 3 | 5 | 6 |
| $\begin{aligned} & \hline \text { Subtotal } 3 \text { baskets } \\ & \text { Total } 8 \text { baskets } \end{aligned}$ |  |  |

|  |  |  |

## 2 Manual Tare

When S445 select Enable, manual tare will be enabled, and preset key [ P ] will be defined as a manual tare key [TM]. In this case, it will not be used as a preset key. The way to input a manual tare is as follows:

| Procedure | Descripition | $\begin{gathered} \text { Key } \\ \text { operation } \end{gathered}$ | Display | $\begin{array}{\|c\|c\|} \hline \text { Display } \\ \text { on 2nd line } \end{array}$ | $\begin{aligned} & \text { Display } \\ & \text { on } 3^{1 d} \text { line } \end{aligned}$ | $\begin{gathered} \text { Display } \\ \text { on the bottom line } \end{gathered}$ | $\begin{gathered} \text { Lit } \\ \text { cursor } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Step 1 | Weigh mode, gross weight or net weight mode, with/without item on the platter |  | 0.000 | 0.00 | 0.00 | $\begin{aligned} & \text { VI } \\ & \text { T\|KKET } \end{aligned}$ |  |
| Step2 | Press key [TM] | [TM] | 0.000 | 0.00 | 0.00 | TRRE II IMPUT |  |
| Step3 | Input the tare value | [2][0][0] | 0.000 | 0.00 | 0.00 | $\begin{array}{r} 7 \mathrm{~m} \\ 0.200 \mathrm{kG} \end{array}$ |  |
| Step4 | Press [ $\rightarrow \mathrm{T} \leftarrow$ ] to confirm | $[\rightarrow T \leftarrow]$ | 0.200 | 0.00 | 0.00 | $0.200{ }^{P T}$ | MET |
| Step5 | Remove all items on the platter and press [T] to press tare. |  | 0.000 | 0.00 | 0.00 | $\begin{aligned} & \text { V7 } \\ & \text { TLKKET } \\ & \hline \end{aligned}$ |  |

Notice: The tare value is not more than the capacity. If it is, "Tare too big" will to show on the bottom, and press [C] can clear indication, press [C] again to clear input, and then press [C] to return the scale to previous status.
If the tare is input by hand, the tare information should be printed on the ticket also as follows:
